OF DATA

≡ ROI: Notes deeply buried value

- Limited skilled Notes resources.
- Apps still in daily use; value unknown
- Lack of understanding, Notes is not as simple as it looks:
  - Not relational.
  - No documentation.
  - Can not easily determine dependencies.
  - Silos of data and processes.

Elevate Migrations

- A one-to-one migration defeats the purpose of getting off Notes
- Break up monolithic Notes structures
- Leverage repetitive business logic

≡ Finally a full spectrum solution
