

Every challenge **needs a partner.**

Visolit Cloud Assessment and Planning workshop

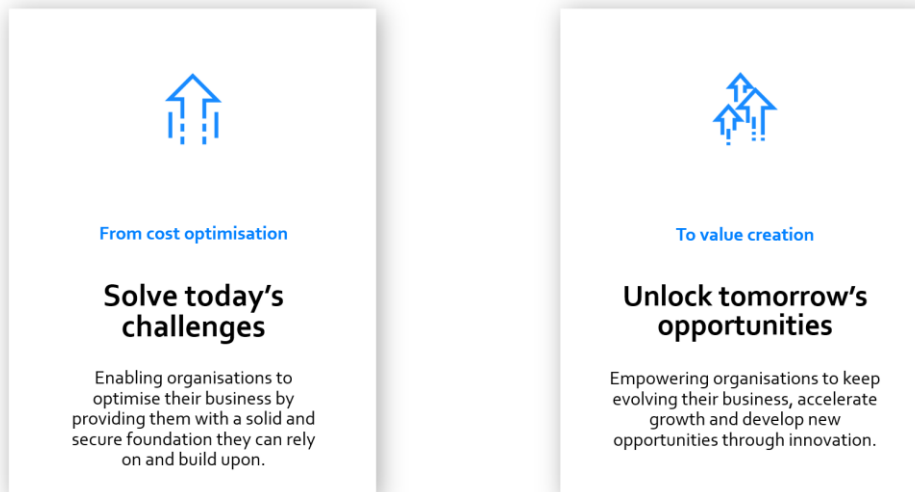

Introduction

At Visolit, we empower our customers to future-proof and accelerate their business. We solve today's challenges for our customers and create value by unlocking tomorrow's opportunities through transformation and innovation. Visolit's foundation is secure by design, underpinned with our networking solutions, powered by our managed services.

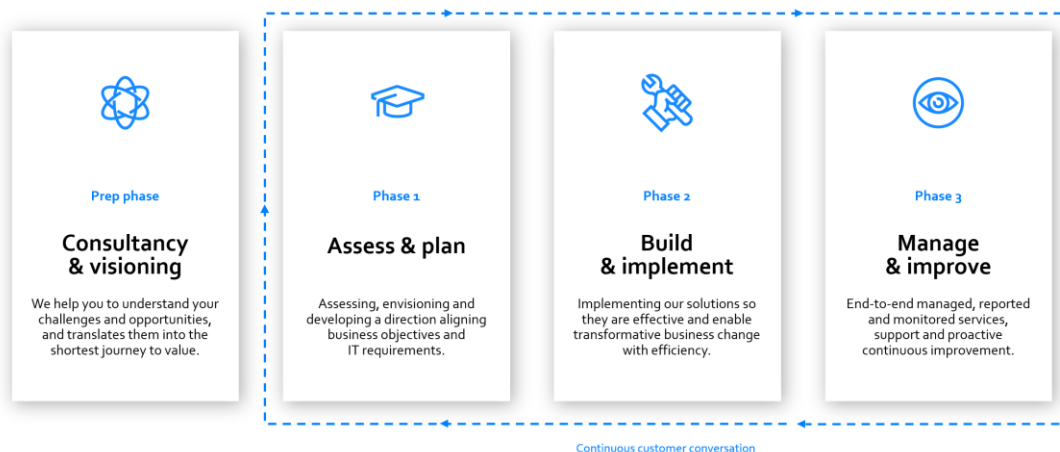

We have spent more than 20 years helping businesses to both optimize their current IT and lay the groundwork to make the most of the opportunities with modern technology.

Approach and Deliverables

Our approach is based on a true understanding of the challenges and opportunities to enable us to Assess & Plan according to the customer needs based on our extensive knowledge and experience from transition and transformation projects for customers moving their data to Public Cloud or a hybrid Cloud environment.

Following the initial assessment our consultants do have the ability and the mindset to support a future Build & implement phase as well as Managing & improving your future environment.

Cloud Assessment and Planning Workshop

The Cloud Assessment and Planning Workshop helps you as a Customer to see the opportunities in the cloud and to find the right combination for how you can achieve your business goals.
