| 15             |                   | Summary  | Wrap-up      |
|                | End training Day  |  |              |

# Wipro's Power Platform Capabilities

Microsoft PowerApps competency is subset of large Dynamics 365 practice in Wipro

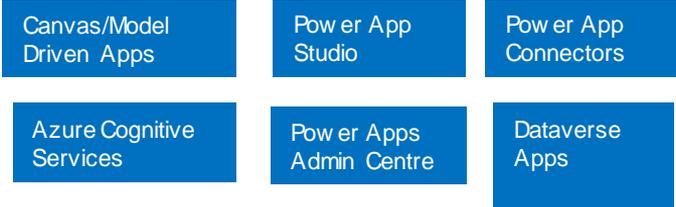

**1000+**  
Power Apps platform  
trained Resources

Dynamics 365 and O365 projects  
experience in Rollout,  
Transformation, COE, Apps  
Development, Administration, and  
support

Power of expertise to make relevant and use specific Power Apps solution leveraging Dynamics Business Application Platform for complete User Journeys

Services  
Offering

PowerApps-based apps can contain:

Multiple data sources

Multiple screens

Ink & pen support

Custom APIs

**20+**  
Senior Power  
Platform  
Consultants

**10+** POVs  
and working  
POCs

**40+** Customers

“PowerApps CoE to support various user groups and functions across business organization”

## Areas of Expertize in Power Apps

- On Demand PowerApps provisioning & Support
- Design development & support
- Building Connectors/Adopters to interact with LOB's and others systems such as O-365, Dynamics 365, Maps ,Sharepoint ,Azure etc..
- InfoPath forms conversion to Power Apps
- Custom API Development for Power Apps
- Canvas UI Development with any device layouts
- Power Apps Performance best practices

**Thank You !!!**
