

Predictive Analytics Jumpstart With Azure Synapse

Deliver On Your Vision, Fast

Predictive analytics has rocketed at the top of the boardroom agenda, with companies envisioning value across functional domains and enterprise-wide processes.

However, these companies still find it a challenge to make predictive analytics work for them due to their legacy & siloed IT infrastructure, capability gap to unlock the power of data to solve critical business problems and the complexities involved in moving to a new environment.

Our team of certified specialists will guide you through a 4-week engagement to accelerate your predictive analytics journey with Azure Synapse Analytics by helping you answer four core questions:

- What are the predictive analytics implementation challenges and how can I mitigate them with proven best practices?
- How can I showcase success and vision of these initiatives to the leadership?
- What should be the implementation roadmap and estimated costs?
- What will the post migration architecture look like?

We Are Driving Meaningful Outcomes

Global Pharmaceutical Company

Detected system failures and rectified issues by building ML models on its historical data and leveraging the power of Synapse Analytics.

Major American Consumer Goods Company

Modernized data infrastructure with a consolidated repository solution utilizing Synapse Analytics, Azure Data Lake and in-built ML models.

Our Delivery Process

Week 1

- Assess data environment.
- Create high-level roadmap and system architecture.

Week 2 and 3

- Setup Azure Infrastructure for POC.
- Enable data ingestion.
- Train Machine Learning Models and test results.
- Validate results and build visualizations.

Week 4

- Conduct Workshop to educate team on implementation process, pain points and mitigation plan.
- Socialize POC results.
- Knowledge Transfer: Codes and all artifacts for next level references.

Final Deliverables

1. High level post migration architecture.
2. Migration estimates and budget.
3. POC code and all artifacts for reference.

🕒 **Duration:** 4 weeks 💰 **Cost:** \$20,000

About Hanu

- 10+ years on Azure with 500+ Azure engagements
- Microsoft Azure Expert Managed Service Provider and Cloud Solution Provider
- Microsoft Gold Certified in Datacenter, Data Analytics and Cloud with Advanced Specializations in Windows Server and SQL Server Migration
- Microsoft US Partner of the Year 2020 for Azure Data Estate Modernization
