

Modern and comprehensive  
**project and portfolio**  
strategy planning and execution

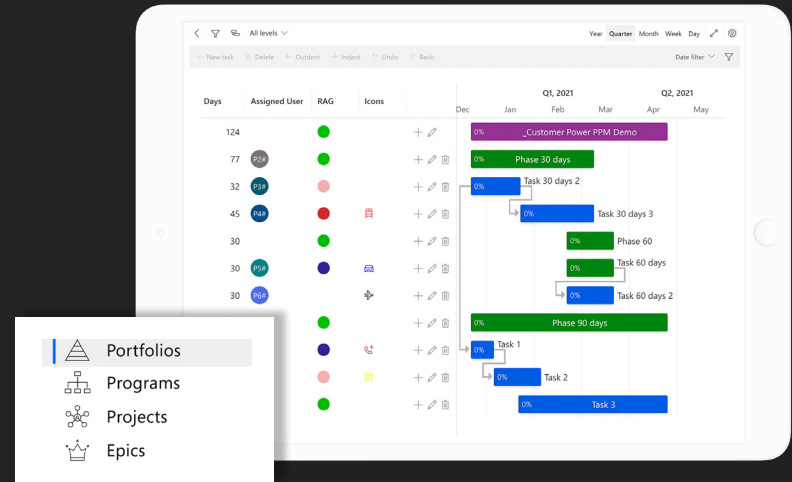

power ppm

# what is power ppm

**Power PPM is a modern PMO solution that provides an end-to-end experience and covers all core disciplines from Project and Portfolio Management to Resource Management and Financial Forecasting.**

With Power PPM you can manage and review your portfolios, progress and costs by providing overall visibility and transparency by linking your project information across the platform. Power PPM is a user-friendly solution empowering leaders to optimize their work and allowing teams to deliver results efficiently.

This powerful solution can be adapted to your organization's needs and is already implemented and used in several of the highest profiled organizations globally.

"Power PPM supports FLSmith's vision of a modern way of working around projects, and I have no doubt in my mind that we will further utilize the Power Platform in the future."

—  
FL SMITH

# Advanced project, portfolio and work management

## Portfolios

Prioritize and control your organization's portfolios. Deliver your strategic objectives while creating top-down portfolios with the full overview.

## Projects

Oversee and take control of all your projects, risks and issues with meta-data gathered portfolio overview.

## Timeline

Make your scheduling easy and transparent. The visual Gantt feature will help you plan ahead your projects and oversee all your tasks.

## Risks

An elegant way to oversee and capture your project and portfolio risks in order to maximize business value delivery.

## Reporting

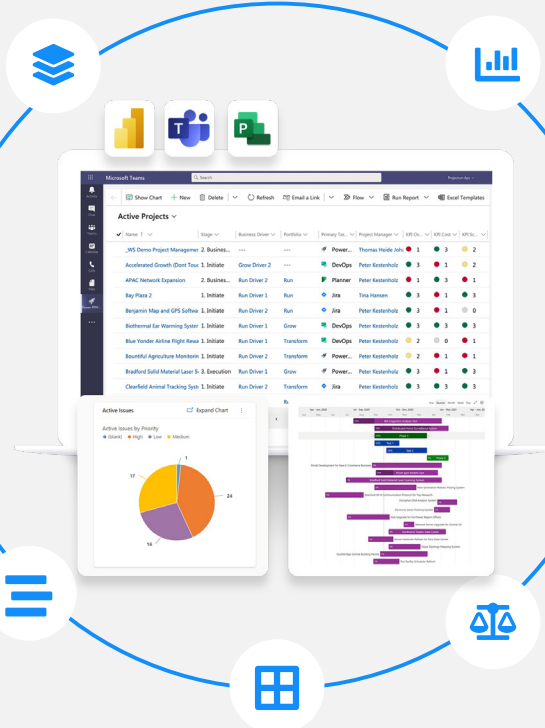

User friendly and easy portfolio reporting by using Microsoft Power BI, which can be embedded in Power PPM and tailored to customer requirements.

## Collaboration

Efficient and improved team collaboration as Power PPM works natively with Microsoft Teams.

## Financials

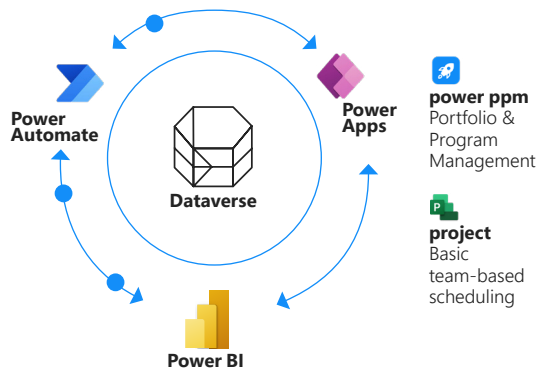

Optimize and calculate cost variance on project and portfolio level and snapshot your financial data. Stay alerted if cost thresholds are exceeded.

# A comprehensive model-driven app

## Power Platform

is the representation of four Microsoft products: Power BI, PowerApps, Power Automate and Power Virtual Agents. They can be used individually or together and thus work as a business application platform. Power Apps is possible thanks to Dataverse, which is the underlying data platform that provides a unified and simplified data schema so that applications and services can inter-operate.

## Innovation anywhere, unlocks value everywhere

## Power PPM

is built on the Power Platform following industry best practices. The solution also natively integrates with Microsoft Teams and extends Office 365 to support all delivery models from Scaled Agile, Hybrid to Traditional. It is also compatible with Project for the web and Dynamics Project Operations.

## Critical Capabilities for Work Management

- 1 **Business model support**  
Tailor your way of working  
Connect your work entities  
Plan top-down and bottom-up

## team planner

[projectum.com/team-planner](https://projectum.com/team-planner)

Backed up by thousands of users from some of the largest enterprise companies, this solution allows any team member or manager, to balance, allocate and improve their resource workload and efficiency. Team Planner has been designed to assist organizations with a simplified digital handshake and a process between Project and Resource Managers to ensure real-time capacity and demand insights are available to the organization.

## time for teams

[projectum.com/time-for-teams](https://projectum.com/time-for-teams)

A simple and user-friendly solution for capturing time spent. Built on Microsoft Azure and made available through Microsoft Teams or via a browser. This solution ensures easy time sheeting with high user satisfaction. Time for Teams has been developed to make it as easy as possible for individuals to register their activities and time spent on them. Time for Teams only requires users to have an Office 365 subscription.

## present it

[projectum.com/present-it](https://projectum.com/present-it)

Export your data in real time to pre-defined Word or Power Point templates. Combine data, work with lists, generate charts and save time.

Present IT is a Power Automate solution for any company or Microsoft partner in need of a better reporting experience.

## power hub

[projectum.com/power-hub](https://projectum.com/power-hub)

A database as a service allowing customers to import and snapshot critical financial, task, resource and project portfolio data.

With Power Hub enabled in Azure, organizations can monitor how data has changed over time, thereby allowing for trend and forecasting analysis to drive better management decisions.

At Projectum, we passionately help our customers by delivering a combination of Microsoft Technologies and Projectum PPM solutions, enabling customers to fulfill business goals and achieve the best results on time and within budget.

Our mission is to be a key part of our customers' success and progress. It is our highest priority to stay on top of new technical developments in order to help shape the future of our customers digital transformation

Together with Microsoft, we share a common vision of allowing executives, teams and individuals to achieve their goals while utilizing the most productive work processes.

At Projectum we work with our clients to ensure our solutions meet their required business operations model.
