

Six steps to Digital inclusion and accessibility

Microsoft Partner

How do you design, build and modernize your digital solutions to be accessible for people of all abilities? "The Six steps to Digital inclusion and accessibility"-framework will help prepare both your organization and your solutions so that people of all abilities can have an engaging experience. According to the WHO* more than one billion people worldwide live with a disability.

Step 1

Awareness – what and why

Step 2

Discovery – identify gaps

Step 3

Select a POC

Step 4

Plan of actions

Step 5

Competence needed

Step 6

Implement – org & tech

What we offer

Forefront Consulting can guide you to become an organization designing solutions with accessibility in mind. We follow this steps together and help you along the way – with the expertise needed.

Key success factors

- Create a clear goal and vision
- · Measure success
- Reinforce through learning
- Engage stakeholders
- Communicate

POC

After we have identified your gaps, select a solution suitable for a Proof of Concept. It should be prioritized from many perspectives for example how important the solution is to the business, legal requirements, how many users involved.

Competence

Get the design thinking right, the technical competence needed (based on WCAG 2.2) and develop new ways of working (routines, roles, content, reviews, tools etc.)

Implementation

The goal is to implement Digital inclusion and accessibility holistically throughout the organization at all times.

Why choose Forefront

- Proven track record of successfully helping organizations with Digital Inclusion and accessibility
- · Wide range of competencies needed.
- Our consultants have the training, experience and knowledge – experts certified as Web Accessibility Specialist by IAAP www.accessibilityassociation.org
- Network with other partners within the area.
