

WSO₂ API Manager

The #1 open-source, complete platform for building and managing APIs with your control.

WSO2 API Manager is a complete platform for building, integrating, and exposing digital services as managed APIs. It helps to unlock the true potential of API-led integration to drive your digital transformation strategy without any hassle.

What We Offer

Build and host composite microservices that can be published as managed APIs.

WSO2 API Manager facilitates integrating different service components, building APIs, and exposing them to consumers.

Manage the full API lifecycle

From design to testing and prototyping to deployment and deprecation, you can manage the entire lifecycle of your web services from one platform.

First-class support for RESTful, GraphQL, and streaming APIs

Manage RESTful, GraphQL, and streaming APIs from a single interface to create a portfolio of digital assets for developers to consume.

CI/CD workflows

Full API access to our management tool empowers DevOps teams to implement custom CI/CD workflows for automated API management and deployment scenarios.

Enhanced security for APIs

Supports standard authentication protocols including OAuth, OID, and basic authentication enhanced with fine-grained access control policies plus AI-driven bot and anomaly detection.

Scalability and Customizability

Our cloud-native API management and microservices gateway fit your architecture to allow you to deliver value at scale and customize the solution to your technical strategy.

Create value-added digital services to different market segments

Package, publish, and promote your digital services as monetizable assets to generate direct revenue, enhance strategic partnerships, and add continuous value to your customers.

Support for a range of deployment options

Deploy to the cloud, to your private data center, to managed cloud-native hosts, or anywhere you need to deliver your digital transformation goals.

of your investment.

About WSO2

Founded in 2005, WSO2 enables the composable
enterprise. Hundreds of the world's largest
corporations, top universities, and governments now
rely on WSO2's open-source, cloud-native solutions to
drive their digital transformation—executing over 6
trillion transactions annually. Using WSO2 for API
management, integration, and customer identity and
access management, these organizations are
harnessing the full power of their APIs to securely
deliver the digital services and applications powering
their businesses.
