

Modernize your data center!

Leverage Azure services to transform your legacy applications

Version 1.0

Gold Cloud Platform
Gold Datacenter
Gold Security

Using the right Azure Services can improve your workloads.

Azure is plenty of services that can modernize and optimize your applications, whether they are legacy solution that must remain on-premises or something you already lift-and-shifted to the cloud.

Our Azure Advisory service can help you defining a road-map to improve them.

CHALLENGES

A traditional IT architecture is often less scalable and efficient than a modern cloud solution.

IDEAL SOLUTION

Through Azure services you can improve the availability, efficiency and security of your applications. Additionally, thanks to hybrid services like Azure Stack HCI and Azure Arc, it's not mandatory anymore to move your applications to the cloud.

DESIRED OUTCOMES

Our modernization activity will give you a clear overview of what you application could be once re-designed, including estimation for Azure consumption and project costs and duration.

Modernize your data center

Improve your on-premises or virtual data center by integrating it with Azure Services that can improve your workloads.

1

DEFINE YOUR NEEDS

We'll define your needs to translate them into a modern application, while leveraging Azure services like Service Map to define dependencies and constraints.

2

INNOVATATE YOUR APPLICATION

We'll design a modern solution that can improve your business, whether it's aimed at an on-premises or cloud data center.

3

ACCURATE ESTIMATION

We'll give you a clear overview about costs in term of Azure consumption and project activities involved in the modernization process.

SoftJam S.p.A. Modernize your data center & Microsoft Azure

Innovate your legacy applications by integrating modern Azure services, to reduce your effort in managing your infrastructure and make it secure and scalable

PLATFORM AS A SERVICE

Replace legacy services hosted on virtual machines with managed platforms to reduce the TCO.

TAILORED TO YOUR NEEDS

The proposed solution will take care of your actual pain points.

SMART INNOVATION

A pragmatic approach: let's introduce the architectural changes that make a real difference in your solution, leaving apart what is cool but useless in your scenario.

Modernize your data center now!
