

# Azure Security Services

Azure Security Assurance Programme

## Azure Security Assurance Programme

Cloud platforms provide enterprises with near limitless capacity to grow and extend their business through a vast array of compute, analytics, storage and networking services. With such a range of readily available and evolving technologies, organisations struggle to gain assurance that their cloud solutions have been designed and configured securely. Kontex helps organisations navigate through the challenges of incorporating security into their cloud and hybrid environments.

### Why Work With Kontex

We combine years of experience working across cloud environments to help organisations with:

- Security Architecture & Design
- Cloud Strategy & Adoption
- Identify & Access Management
- Configuration Assessments & Reviews
- Alignment to Industry Standards & Good Practice
- On-going monitoring across Cloud environments

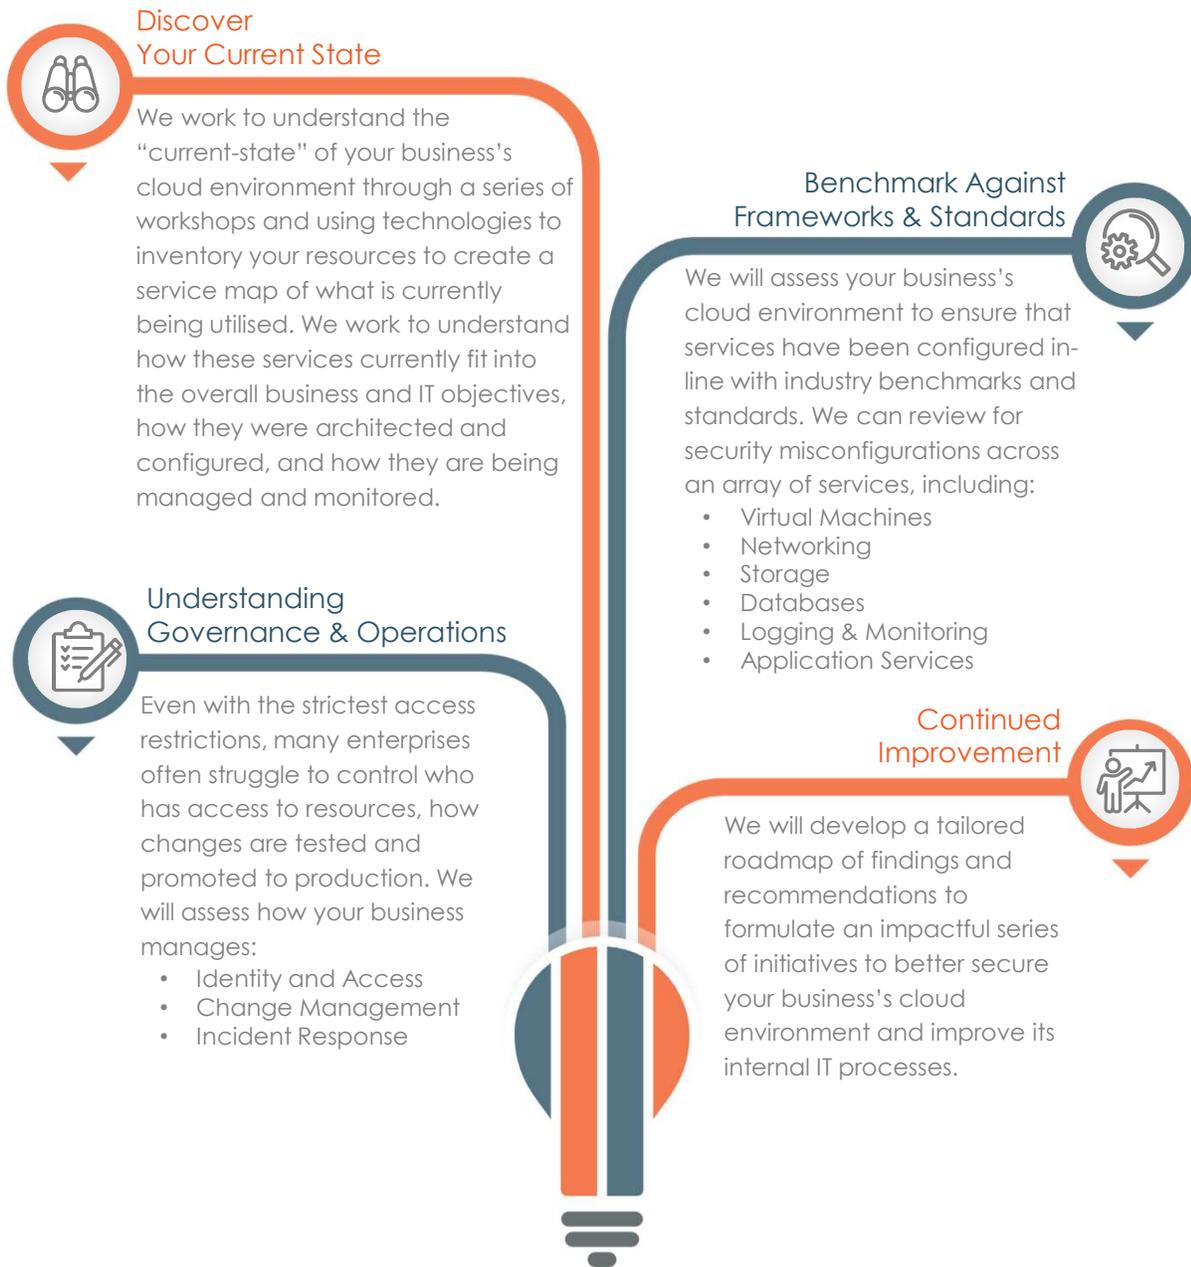

*Gain confidence that your Azure environment and solutions have been designed, implemented, and configured securely.*

## Gain Assurance

We will work closely with your business to provide a holistic approach to securing your cloud workloads.
