Gartner Leader

Magic Quadrant for Public Cloud
Infrastructure Professional and
Managed Services, Worldwide

“The unique aspect of our relationship is expanding all things we’re doing here at Microsoft, it’s all about coming together to deliver the best managed services for the customer globally. We’ve really come together with Rackspace Technology to team up where it counts. **We trust Rackspace Technology** and deeply value the partnership here at Microsoft.

Judson Althoff
Executive VP, WW Commercial Business

SOW-BASED PROFESSIONAL SERVICES

MONTHLY SUBSCRIPTION

Rackspace data estate modernization accelerators for Azure

Data & Analytics Workshop

Duration: 2 days

Uncover the possibilities and learn about various modern data solutions enabled by Azure analytics services.

Azure SQL Migration Business Case Workshop

Duration: 5 days

Analyze your current IT infrastructure and develop a broad roadmap to move your SQL servers and apps to Azure.

Synapse Analytics MVP

Duration: 8 weeks

Engagement to help you envision your modern analytics systems through a minimum viable product implementation.

Azure AI/ML Ideation Workshop

Duration: 1 day

Work with a Rackspace Technology data scientist to uncover the possibilities when leveraging Azure AI & ML.

MLOps Foundations

Duration: 6 weeks

A framework built on Azure that enables rapid development, training, scoring and deployment of models.

Rackspace DataOps Implementation

Duration: 4 weeks

Improve the quality and speed of data analytics on Azure with elastic engineering for data.

MLOps Foundations

MLOps

Model reproducibility

Model validation

Model deployment

Model retraining

Key challenges to leveraging machine learning

Reproducibility

Configuration issues from multiple environments, versions and datasets

Reusability

Models running across different environments using various datasets

Manageability

Manual hand-offs between various teams and no UI tracking system

Automation

Whole lifecycle could take months with 25+ steps and manual deployment process

“More than 60% of ML Models never make it to production.” –Gartner, 2019

Accelerate the path to production

Automation

MLOps Foundations

Fast track operationalizing the model development lifecycle with our Model Factory Framework and proven accelerators so your team can build new revenue streams, increase efficiency and deliver incredible experiences.

Reproducibility of models and predictions in multiple environments

Standardized environment for model development among data science teams

Tools for diagnostics, performance monitoring and addressing model drift

Automated deployment of models across Dev, Q/A & production environments

Model lineage for governance and regulatory compliance

Collaboration platform so data science teams no longer work in silos

Accelerated return on investment (ROI) and faster time to insights

What is the Model Factory Framework?

The Model Factory is a ML Operations framework built on Azure using open-source tools that enable rapid development, training, scoring and deployment of models.

Process Automation

Fully Automated CI/CD Pipeline
Deployment Process (Jenkins/
Github/Code Pipeline)

Azure Tooling

Utilizing the power of Azure
infrastructure and orchestration
tools

Cloud Agnostic

Register, package, train and
deploy models from
anywhere (cloud)

Version Control

Project packaging for easy
source/version control. Resolves
reproducibility/ reusability issues

FEATURES

Experiment
Tracking

Supports major ML frameworks such as TensorFlow, Scikit-Learn,
Spark ML, spaCy, Pytorch, etc.

Multiple Deployment
Backends

Integration with automation and
orchestration tools like Airflow,
Jenkins, Code*, etc.

Tracking UI

CI/CD

Project packaging for easy source
control and reproducibility

Solution can be tailored to specific workflows and business needs
through building customization around primary architecture pattern

ML Model Integration and Pipeline Development

Integration of open source platforms

MLFlow Tracking UI

Visualize, search, and compare runs or download run artifacts for analysis in other tools

Experiment Tracking

Log and view parameters, metrics, and artifacts for each model/experiment

Breadth of Expertise

Support for major ML frameworks (TensorFlow, Spark ML, SCikit-Learn, spaCy, PyTorch, etc.)

Lifecycle Management

End-to-end solution for managing the lifecycle of ML models

CAPABILITIES

Reproducible ML Pipelines

Reusable Code

Easy Source Control

Performance Check

Team Collaboration

Azure MLOps Foundations

Significantly reduce the ML lifecycle in weeks with a solution that brings tailored agility to your machine learning models and maturity to operational processes.

	WEEK 1 Discovery & Planning	WEEK 2 Environment Implementation	WEEK 3 & 4 Model Integration & Onboarding	WEEK 5 Knowledge Transfer
 Activities	<ul style="list-style-type: none">- Review current state and design environment deployment	<ul style="list-style-type: none">- Design, build, test, and validate environments and integrations	<ul style="list-style-type: none">- Onboard, integrate, test and validate models into the ML Pipelines	<ul style="list-style-type: none">- Provide documentation and training to customer's teams
 Outcomes	<ul style="list-style-type: none">- Environment deployment scope and design	<ul style="list-style-type: none">- Dev, QA, and production environments complete	<ul style="list-style-type: none">- 1-2 working models and pipelines	<ul style="list-style-type: none">- Customer's data science teams enabled to on-board new models

 Deliverables	<ul style="list-style-type: none">- Complete Dev/QA/Production environments- CI/CD pipelines and deployed models- Automation, integration code and scripts- Architecture diagrams and documentation

MLOps Foundations on Azure

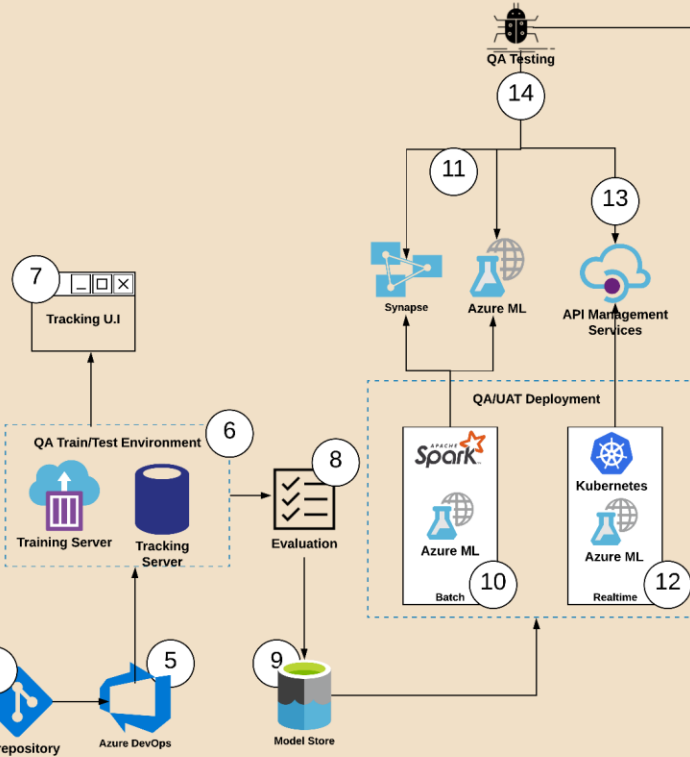

Rackspace's Machine Learning Model Factory (Azure)

Development

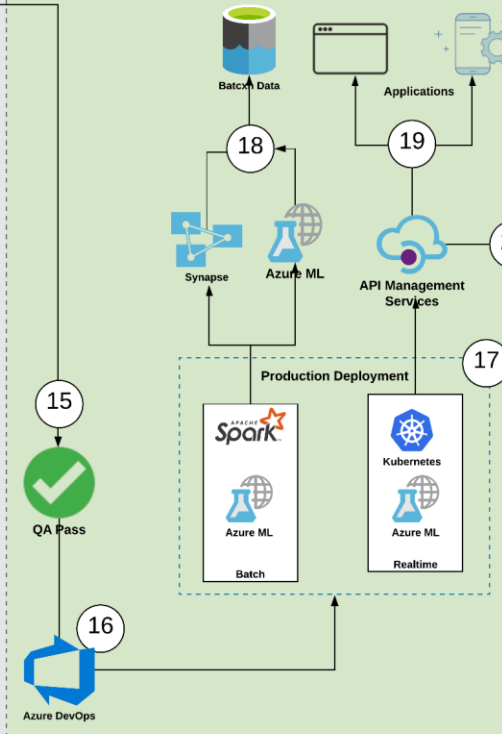

1. User Development Environment
2. Remote Tracking Server, Train, Validate & Test Environment
3. Tracking UI to view, compare and visualize metrics from experiments
4. Source and Version Control
5. QA/UAT - Train, Validate, Test and Deployment Pipeline
6. QA Environment - Remote Tracking Server, Train, Validate & Test
7. Tracking UI to view, compare and visualize QA runs
8. Evaluation of model metrics and results
9. Model Artifacts Repository
10. Deployment for Batch Inference (Spark UDF, Azure ML, H2O Pojo etc...)
11. Distributed Batch Inference on HDInsight or Azure ML
12. Deployment for Realtime Inference (Microservices on K8s, Azure Endpoint)
13. Azure API Endpoint for Realtime Inference
14. QA/UAT Model Testing
15. QA/UAT Test results validation
16. Production Deployment Pipeline
17. Batch Or Realtime Production Deployment
18. Distributed Batch Inference on Production Data
19. Deployment for Realtime Inference from Production Applications
20. Inference data sampled into a data store
21. Manual or automated labeling
22. Scheduled Jobs(Spark) to calculate variances
23. Feature store to get feature statistics(Training data)
24. Log metrics to Log Analytics

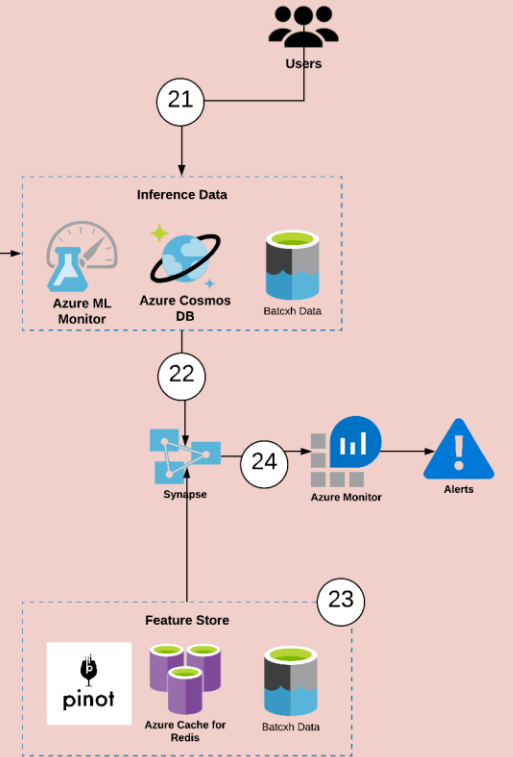

QA/UAT

Production

Monitoring

Water & Utilities Company can now develop and deploy machine learning models at scale

Challenge

With several ML models implemented in various environments, the customer was seeking a consistent mechanism to quickly track the best experiment runs as well as a managed hosting platform with automated deployment and promotion pipelines.

Solution

Rackspace Model Factory Framework integrating cloud services and 3rd party applications and solutions including Python, MLflow, Tensorflow, Horovod, and Petastorm.

Achievement

By implementing Model Factory Framework, the customer was able to package and deploy all the models they had consistently with a quick turnaround time to pre-processing, training and testing the models. They are now able to track and compare their parameters and accuracy metrics across different experiments irrespective of the ML framework utilized.

Why Rackspace Technology for your Azure workloads?

We unlock the value and potential of your data

Customers' needs...

Actionable, real-time insights

Resource & cost efficiency

Data governance

Microsoft Azure

...are met by combining
leading Cloud products...

Architecture & platform services

Next-gen tools & products

Improved security and compliance

...with unique Rackspace
Technology solutions

Deep Cloud technology expertise

End-to-end transformation

Fully managed environment

DEEP INTEGRATION WITH PARTNER

Why choose Rackspace for data solutions?

Deep expertise for all major database, analytics, and AI/ML technologies

Operational data management with 24x7x365 global support

Simplified approach combining an agile delivery model and automation

With leading alliances and partnerships for full environment coverage

**All wrapped in
Fanatical Experience™**

Get Started – Data Discovery Session

Take advantage of a complimentary strategy session to learn how Rackspace can accelerate your path to becoming a truly data-driven business.
