

# Boost Revenue, Increase Customer Satisfaction, and Reduce Costs with Predictive Maintenance

## Digitize your Asset Maintenance with Outcomes as a Service

If your company is ready to bridge the OT/IT chasm, our Outcomes as a Service (OaaS) solution will serve you with deep insights that improve overall operational efficiency and facility utilization by 10% or more. Our solution leverages predictive algorithms to yield better overall outcomes and prioritizes labor to the areas that need it most.

Our unique and innovative Edge devices are designed to operate outside the data center, which enables an increased decision speed, optimizes network bandwidth, and provides high-end AI/ML performance — all powered by the world's highest-performing Edge computing server. With automated OT data collection processes, our solutions, powered by cloud-like architecture, powerful analytics with continuous training, and automated operations with light-touch provisioning, provide flexible resource sharing between nodes, centralized management, and security hardening.

### How It Works

### Did You Know?

OT networks are still largely isolated from the rest of the IT world, running on proprietary control protocols, specialized hardware, and embedded proprietary operating systems — making them impervious to the benefits of modern AI.

#### Theme Park Data and Machine Learning Platform

*How a global media and theme park operator is dedicated to surprising and delighting visitors all over the world.*

Atos developed a high-speed streaming data analytics platform that processes 180 Billion data points every hour for our customer. With enhanced compute power and storage, Atos Edge devices keep the data secure and process the data in real-time.

## What We Offer

### Kickstarter Workshop

Solution Design cross-functional workshop to identify and prioritize use case candidates to demonstrate value quickly for clients, with an eye on scalability and adoption

Identify and create an inventory of business use cases

Document the high-level goals and/or requirements

Define target actors, process, data, and systems with SMEs

Outline business value or risk mitigation thesis

## Business Benefits

### Eliminate vendor lock-in

We develop all code with portability and availability in mind — from the Edge to the Cloud — leveraging standard southbound/northbound protocols.

### Accelerate time-to-business value

Atos' innovative as-a-service business model frees capital, reduces friction for scale up/scale down, and focuses on delivering faster outcomes.

### Leverage single-sourced components

From IoT gateways to connectivity to security to powerful edge analytics computing, the Atos solution brings everything you need to start digitizing your OT environments.

### Platform for business growth

Move to a future-ready platform that offers flexibility and easy interoperability from the Edge to the Cloud, either public or private.

Schedule your **Predictive Maintenance Acceleration Workshop** today and get started on your journey toward immersive business experiences.
