

Description

The Business check up and digital strategies development workshop offers, through different techniques, point out and prioritize the problems of the different business areas, such as operations, finance, HR, logistics and distribution, etc.

This workshop helps organizations to identify big shot solutions and their benefits to improve the operations processes and results.

The business solutions are integrated with all the resources needed, such as technical, human and financial, and the key results expected from them.

This program results in the objectives and the digital transformation path of the company.

Empower to the organization to create value through big shot solutions.

Benefits

- Motivates the resolution of change in the organization: raise awareness about the problems to start the process.
- It diagnoses the needs of the company through analysis of business applications: operational, technological and strategic.
- It facilitates the prioritization of business problems.
- Raise awareness among the members of the organization about the challenges and possible solution scenarios.
- Enables the organization to align the findings to the processes, structure, culture and strategy of the company.
- It yields results that lead to the planning of projects through a dynamic digital transformation map.
- Solution designed to visualize the future state of the business.

Buyer profile

Companies that seek communication, registration of their operations and management of their data in a comprehensive and efficient way.
