CLOUD MIGRATION SERVICES IN MICROSOFT AZURE

LIFT-AND-SHIFT

YOUR SOLUTION TO AZURE

For businesses beginning their transition to the Cloud, migrating existing applications to an Infrastructure as a Service (IaaS) platform via a lift-and-shift approach is a common first step, as it replicates in-house apps in the cloud without any redesign.

Achieve seamless migration into the Microsoft Cloud

✓ Eliminate the unexpected downtime and poor performance of your application

✓ Grow efficiently – use the Cloud to optimize your costs, by reducing or eliminating hardware costs and maintenance and paying only for what your application uses

✓ Easy recover data in case of data loss scenarios (data accidentally deleted, volume deleted, viruses etc) or disasters (server destroyed/stolen, disk crash)
