

# Power Platform for Public Sector

Cloud adoption, application modernisation, management and governance at scale

## Low-Code Cloud Transformation with Power Platform

Public sector organisations across defence, intelligence, public safety, justice, and the civil service leverage Power Platform to transform their work in the cloud to build agile business processes, generate value with proactive insights, and enable always-on service. Establish a single source of truth for data, meet new needs quickly, and reduce platform costs and technical debt by consolidating your many workloads on one platform and embracing the capabilities of low-code.

Whether you are modernising your case management or automating planning around deployments and exercises, our **Power Platform Centre of Excellence (CoE) as a Service** offers the leadership, experience and expertise to help large global financial services firms **get established** on the platform, **migrate and modernise** workloads and applications and **manage and govern at scale**. We provide an end-to-end approach or as a complement to your IT team, ramping up and scaling down as your needs evolve and providing you access to world-leading experts and recognised Microsoft MVPs.

## The AIS Approach

AIS leads and publishes the **Power Platform Adoption Framework** as the global standard for adopting, managing, and governing Power Platform at scale. Find it at <https://aka.ms/PPAF>. Our methods, patterns and technical tooling help large organisations get the most from Power Platform. Finally, the AIS Cloud Adoption Portal provides leaders with a single pane of glass for managing your application development roadmap, tracking adoption milestones and monitoring risks to enterprise management, governance, and security of the platform.

## Get Established on Power Platform

Power Platform is built for scale. Our best practices help large organisations get started the right way with an eye to scalability from day one. You can expect these six activities in our first several weeks together.

### Envisioning

Identify and prioritise workloads that might be re-imagined on Power Platform.

### Adoption Plan

Create a plan to guide our work establishing and maturing the platform.

### Enterprise Management

Identify platform maturity within the organisation, prioritise and plan next steps.

### Platform Standup

Execute on the platform establishment priorities identified in our workshops.

### Proof of Value

Develop one or more high-priority solutions that demonstrate value quickly.

### Cloud Adoption Portal

Establish a single portal for insights to your application roadmap, milestones, and enterprise management.

PowerApps and Power Automate Award

# Migrate and Modernise

Our patterns, tools, and automation accelerate development of four “flavours” of workloads on Power Platform.

## Meet New Business Needs

Quickly build new solutions to emerging yet complex business challenges, needs, and use cases with low code application platform tools.

## Sunset Legacy Technologies

Migrate from end-of-life tech such as InfoPath, Lotus Notes, SharePoint workflows and apps, Access, legacy CRM and ERP, etc.

## Re-Imagine Existing Applications

Modernise for mobile and web, automation, chatbots, data visualisation, AI and predictive analytics with a single source of truth for data.

## Support Citizen Developer Productivity

Support citizen developers building their own productivity-grade apps to meet their own less-complex needs.

## Case Study: Modernising HR, Recruiting, and Talent Management

A major defence organisation sought to modernise its personnel system in order to enhance the recruit experience, increase efficiency, improve data quality, and eliminate duplicative data entry in multiple legacy personnel systems.

AIS worked with IT and HR personnel to establish a single source of truth for job and personnel data, build an interactive candidate portal through which new arrivals to the organisation could apply and interact with HR personnel, and an internal recruit management application to manage in-service recruiting. We then established an automated data integration with the legacy HR system in order to improve data quality and eliminate dual entry in both systems.

Now we continue to help the organisation roll out new capabilities on their application modernisation roadmap. AIS used our CoE as a Service model to help the organisation adopt, manage, and govern the platform at scale. Apps, automation, and business intelligence freed military and civilian personnel to focus on their mission, providing leadership with instant access to accurate data to drive decision making.

## Manage and Govern at Scale

Mature organisations realise that rigour, discipline and best practices are needed to manage and govern the platform at scale. We'll ensure that the platform is managed, governed and secured. We'll back that up with assessment and monitoring of the five pillars below, ramping up to support application development when needed.

Platform Management	Enterprise Architecture	Application Lifecycle Mgmt.	Mature Security Model	User Empowerment
<ul style="list-style-type: none"><li>• Project Tooling</li><li>• Backlog Management</li><li>• Road Mapping</li><li>• COE Starter Kit</li><li>• COE Establishment</li></ul>	<ul style="list-style-type: none"><li>• Authentication</li><li>• Environments</li><li>• License Management</li><li>• Reusable Components</li><li>• Data Ecosystem</li></ul>	<ul style="list-style-type: none"><li>• Developers</li><li>• Developer Standards</li><li>• Source Control</li><li>• Deployment Pipeline</li></ul>	<ul style="list-style-type: none"><li>• Security Accreditation</li><li>• Platform Security</li><li>• User Management</li><li>• Data Loss Prevention</li></ul>	<ul style="list-style-type: none"><li>• Tiered Support</li><li>• Business Onboarding</li><li>• Citizen Developers</li><li>• Community Nurturing</li></ul>
