Migrate to Azure Cloud

5-week Implementation

Xavor | 25 Years | ■■ Microsoft Gold Partner

Ensure business continuity by improving performance with Xavor's end-to-end Azure Cloud migration solution tailored to your unique business environment.

Our experts develop and execute a purpose-built, low-risk migration strategy to enable you to overcome the most common business challenges with an on-prem environment:

- High risk of data loss in case of system failure
- High vulnerability of critical data to breaches and cybercrimes
- Frequent data accessibility challenges
- High maintenance costs
- Limited scalability of infrastructure

Xavor equips companies to migrate their infrastructure to the cloud with Azure Migrate and eliminate these issues.

Migrate to the Azure Cloud with Xavor to achieve Efficiency, Agility and Scalability

Accessibility to data from anywhere around the globe

Efficient infrastructure management and reduced unplanned downtime

Agile environment that adjusts to changing business realities

Enhanced security with an effective disaster recovery system

Improvements in productivity owing to company-wide availability of real-time data

Our team of experts works alongside your team to assess your existing infrastructure to build an application profile and develop a migration strategy based on your unique business processes. The Database Migration Service then allows for a seamless migration to the cloud with minimal downtime.

Our Process

Xavor's end-to-end Azure Cloud Migration takes a systematic approach by following a series of steps to deliver a fully operational and risk-free migration to the Azure Cloud:

Timeline	Program	Particulars
Week 1	Discovery & Assessment	• Analysis of existing solution(s) • Key component identification • Dependency tracking
Week 2	Migration Roadmap Creation	• Migration plan (data, application) • Azure services recommendation • Cost optimization plan • Migration order and roadmap
Week 3	Execution	• Provision cloud resources • Configure cloud resources • Initiate data migration • Initiate application migration
Week 4	Review Migration Success	• Review • Validation • Finalize migration execution • Final cutover
Week 5	Post-Migration Support	• Post cutover monitoring • Issue resolution • Future optimizations and recommendations

Disclaimer: Timeline and costs may vary based on detailed scope of engagement.
