

An immersive experience for your team that will equip employees with the skills they need to provide your system administrators with proper guidance and best practices around governance and utilization of CoE.

This offering primarily focuses on Power Apps (Apps/Portals), Power Automate and Power Virtual Agents. Through the many installs and education sessions Long View has found direct correlations with improving innovation, adoption, maximizing productivity and automation. Long View Systems would perform assessment and discovery to help the client configure and install the Power Platform Center of Excellence. Long View systems will provide high level training sessions to allow clients to manage and utilize the Power Platform Center of Excellence reports.

## Discovery Sessions

(1-2 Days)

- Analysis and discovery of existing Power Platform environments
- High level environment security analysis and requirements
- CoE outcome and goal's introduction and discovery

## COE Configuration

(3-4 Days)

- Users and service accounts setups and discovery
- Set up and configurations of COE components
- Verify the configurations and COE setup

## COE Training

(5 days)

- Power Platform Admin Center
- Working with environments
- Security
- Solutions
- Data loss prevention
- PowerApps administration
- PowerPlatform administration
- Dataverse (CDS) administration
- Center of Excellence Overview and Best Practices

## Outcome

The CoE provides visibility via graphical insights, data, and analytics of the existing or net-new Power Platform ecosystem.

Post CoE enablement organizations will be armed with a toolset which visualizes those insights and analytics through Power BI dashboards and reports. This enables an organization to become proactive, and enables a governed, fast, and efficient Manner upon which to grow the Power Platform ecosystem.
