

# Azure Governance

*A four-week project where Zure creates a tailored cloud governance documentation and educates your key personnel on it.*

*The topics of the governance must be addressed early on in order to ensure a successful use of cloud within the enterprise.*

## THE PROJECT

- We deliver a tailored cloud governance document to describe the following governance topics:
  - Governance fundamentals
  - Governance roles and in-house team responsibilities
  - Governance technical implementation best practices
  - Real-time monitoring and alerting recommendations
  - Cost management and optimizations
  - PaaS lifecycle management

We educate your key personnel on the governance in the following areas:

- Enterprise Architecture
- Infrastructure Operations
- Managed Application Operations
- Application Development
- Risk Management
- IT Security

The project starts with a kick-off meeting and ends with a handover workshop. In between we'll have meetings as required.

## THE PURPOSE

- To understand the requirements of best practice Azure governance
- To understand how to implement Azure IaaS and PaaS adoption in your organization
- To understand how to mitigate public cloud risks
