

QUICKSTART: AZURE CAF LANDING ZONE WITH BARRACUDA CLOUDGEN WAF

10TH MAGNITUDE

Powered by

10th Magnitude's Azure Landing Zone solution allows organizations to quickly deploy a Cloud Adoption Framework (CAF) aligned Azure infrastructure. The Azure CAF Landing Zone delivers best practices based on production-proven infrastructure components to get your Azure implementation started quickly. Powered by Barracuda: A single shared service Barracuda CloudGen WAF comes integrated into this deployment to support requirements for secure web-facing applications.

ENGAGEMENT DETAILS

PHASE 1

Kickoff & Design

Understand your environment and goals. Review the components of 10th Magnitude's Azure Landing Zone, deployment details, design, and deployment parameters following Microsoft-stamped CAF implementation methodology.

PHASE 2

Core Services Deployment

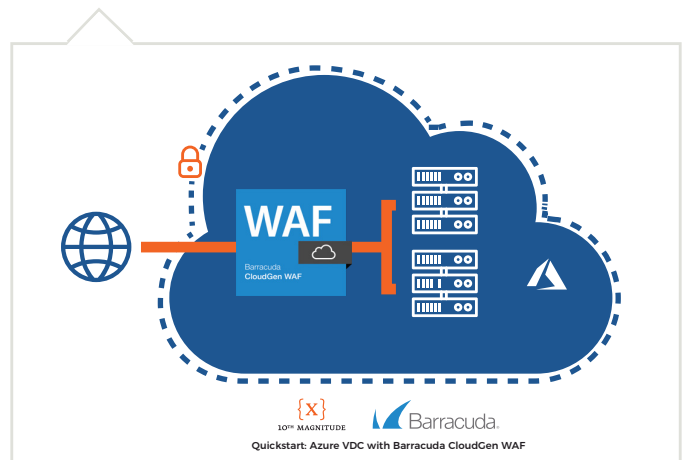

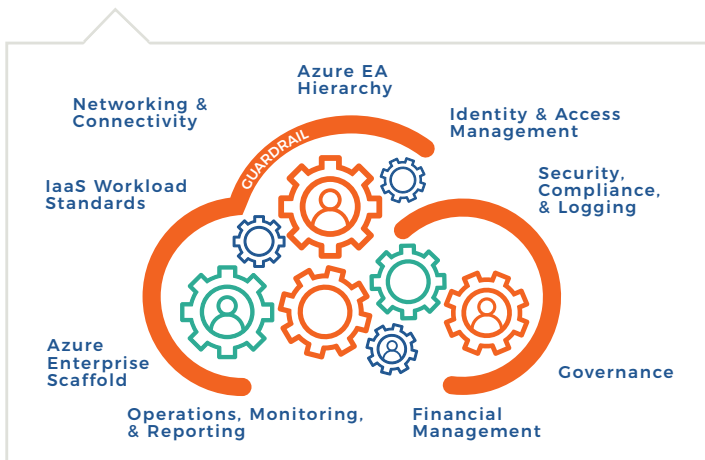

Evolve design details into active deployment activities. Integrate core components, including Barracuda's CloudGen WAF and disciplines of the VDC, to establish shared services and foundational environment to enable your business and client workloads.

PHASE 3

IaaS Workloads & Operations

Establish Azure platform service standards and deployment steps to accelerate workload provisioning, integration, and enterprise supportability requirements. Introduce security, operations, and governance procedures to create a scalable and deployable Azure cloud.

COST

\$50,000

Eliminate trial and error. Build and configure your environment with comfort. Ensure the critical components for your cloud delivery are established.

NEXT STEPS
