Cloud Adoption

Technically and commercially wise, digital transformation turned to be the most reasonable and indispensable long-term strategy for the organizations. Cloud is the foundation for this new agile business world.

Cloud adoption will help organizations in many way. It will save operation Cost, faster time to Market, brings scalability, flexible cost management and application Modernization

- Retiring Sunset Products & Services
- Renewing Contracts
- Extending Support of Services
- Saving on CAPEX & OPEX
- Modernizing Application

- Adding New Capabilities to your Business
- Optimizing Resources
- Reducing GTM Time
- Addressing Modern Threats by Modern Security Measures
- Adhering Regulatory Compliance
- Measuring Business Continuity

Cloud Migration

Is the cloud secure for my apps?

Which apps make sense to run in the cloud? Can I trust my business-critical app to a cloud vendor?

Can I modernize apps with minimal disruption?

Do I need other tools to manage my cloud and on-premises (or hybrid) environments?

I'm out of support, but not ready to upgrade. What are my options?

How Can I ensure my Organizations Compliance?

Microsoft Azure

Microsoft Azure is an ever-expanding set of cloud services to help your organisation meet your business challenges. It's the freedom to build, manage and deploy applications on a massive, global network using your favourite tools and frameworks.

Unmatched security

6.5 trillion threat signals analyzed daily, 3,500 security experts, \$1 billion per year investment in security

Unparalleled innovation

Only cloud with evergreen SQL, which never needs to be patched or updated. Unique, built-in resource management and governance . Only fully-managed service for any .NET app

Unbeatable offers

Pay As You Go, Azure Hybrid Benefits, azure reserved instance

Built-in hybrid

Operate seamlessly across your datacenter and the cloud

Only cloud provider with end-to-end hybrid infrastructure

2.5M+ hybrid enabled Windows Servers through Windows Admin Center

Most comprehensive backward and forward SQL compatibility with Azure SQL DB Managed Instance

I am Ready, who will help on the Migration?

Is there a framework?

Where do I evaluate the different scenarios and tools that can help me execute my migration strategy?

How do I discover my infrastructure and applications?

How do I perform migrations for servers, databases, and more?

I want to have an overall cloud migration estimate with TCO

I want to integrate with my existing deploy Security Solution, Who have the expertise on multi vendor solution integration

I Want a reliable Cloud trusted advisor in Qatar to Work on my requirements
