

3-phased approach for WVD implementations

Assessment

- Introduction to use cases and scenarios
- Understand the landscape for building the WVD -> AD / File servers/ Desktops / Laptops / WVDs Understand the Organization Security / Compliance need
- Understand the IT standard operating procedure

Foundation Setup

- WVD user profiles
- User category with profile mapping
- Process of accessing the WVD (Technical)
- Azure landing zone
- Active directory integrations
- WVD security
- Backup
- Data migration from on-premise to Cloud and Sync back solution (for migration case)
- Commercial estimates
- Deployment timelines

Deployment / Migration of WVD Environment

- Azure subscription
- Create landing zone
- Create AD users & policy
- Configure MFA / PIM (if required)
- Build WVD profiles and environment
- Test profiles
- Migrate on-premise data
- Test and commission
- Configure backup of WVD infrastructure
