

Language Intelligence Service AI(LISA)

LISA reduces dependencies on rigid processes and people.
Harmonize information growth and delivery needs.

LISA suite of services is uniquely designed to deliver a true AI Digital experience to Enterprise information. It intelligently machine learns complex information residing in data silos to flow to enterprise user conversationally.

Why LISA

Increased Employee Productivity and Efficiency

Improved AI centric data driven insights and cost reduction

Power of cloud scale applied to digital business processes and intelligent automation

True AI Experience

- Search & Conversational
- Multi-channel Availability
- Multi-lingual enabled
- API based process automation

Digital Enterprise Integration

- Extensible and scalable
- Cross-boundary Synthesis
- Digital Building Blocks for business transactions

Advanced NLP & NLU Capabilities

- Conversational AI on Enterprise
- Cognitive Search with AI skills
- Language Understanding Skills

An AI based Enterprise Information Processing

Tangible Benefits / Desired Outcomes

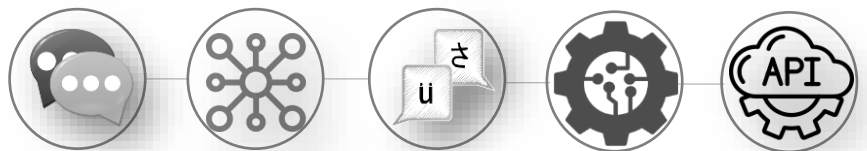

- Maximize Business Efficiency with real-time Intelligence
- Elevation of Enterprise Information access channels
- Productivity increase with minimal manual steps
- Significant reduction in cycle times

Why HCL Technologies?

HCL Technologies is a next-generation global technology company that helps enterprises reimagine their businesses for the digital age

The HCL-Microsoft alliance is focused on driving individual productivity and enterprise value. Our 15+ year relationship is built to ensure the success of our shared clients. HCL and Microsoft leverage this collaboration to deliver value through industry solutions and client services innovation. A key driver for the Microsoft relationship is the HCL Infrastructure Services Division, continuing to expand rapidly to deliver managed services on the Microsoft platform.

LISA combined with Microsoft's evolving Azure Cognitive Services, Advanced Azure AI systems, PaaS Cloud Offerings would give enterprises the much-needed recipe for bringing about a real AI first Digital Workplace transformation.

Conversational Channels Multi-Lingual Integration API driven

Our promise to you

Improved operational efficiency and increased employee productivity with cost reduction

An offer to get you started

- We would significantly improve employee productivity and eliminate process inefficiencies
- Our solution is a power-pack of cutting-edge Cognitive services and state of the art AI on NLP and NLU
- We would enable emerging next in Intelligent Digital Conversational Assistance, Intelligent Search, Self-service document processing with AI capabilities
- We have delivered continuous new business value driven through data and AI to a multitude of enterprises
