# remoto

Remote Software for a Remote Workforce

Take the distance out of remote working by monitoring, tracking and managing devices anywhere in the world as if they were right in front of you!

By giving you the tools to monitor and maintain a healthy online workspace, we aim to give you peace of mind that your work force is not only productive but that their individual wellbeing's are being protected.

The perfect solution for...

Training

Software that supports your company's workforce with tools to keep everyone connected and engaged, assisting with training needs of new recruits ensuring higher retention rates for new starters.

Device Monitoring

Giving you the power to remotely manage hundreds to thousands of desktops all from one single platform, with a comprehensive suite of network administration tools.

Safety and Wellbeing

Monitor desktop activity in real time, keep track of user productivity and keep an eye out for behaviour that is unrelated to the task.

Asset Management

Keep up to date on which devices are the worst performing or least utilised, allowing you to take action and make more informed decisions on upgrades and renewals.
