

CITRIX ASSESSMENT

Now, more than ever, your remote work environment is critical in connecting your virtual team and your organization's workspace. Our Citrix Assessment will help determine if your environment is keeping pace with increasing demands and fully optimized to meet new requirements.

Our Citrix Assessment Includes

During the assessment our team will review your on-premises and cloud-hosted virtual apps and desktop environment during our assessment and analyze your Citrix Virtual Apps and Desktops (CVADS) environment. Our team will evaluate your current architecture, design, and redundancy and explore how it aligns with your key business objectives. We will provide insight and a roadmap to unlock more value from your environment.

- » Analysis Session - Our team will execute a 4-hour session to perform a SWAT analysis leveraging the assistance of your IT stakeholder.
- » Expert Evaluation - A certified Coretek Solution Architect will evaluate your environment's current architecture, design, redundancy, and state. Then, using tools, methods, and focused questions, they will gather critical findings needed to perform the assessment.
- » Assessment Documentation - Our team provides an overview document of critical findings during the assessment with recommendations for the next steps. This document provides valuable insights into your current environment with final documentation you can use to make informed decisions.

We guarantee our services and your overall success. If there is a problem, we will solve it. **We deliver customer success, no exceptions!**

KEEP PACE WITH THE DEMANDS Of Your Hybrid Workforce

Coretek is a Citrix Platinum Partner specializing in designing, building, and managing Intelligent Workspace solutions. Our deep experience drives end-user computing hybrid cloud architectures in the most demanding environments globally. We deliver workloads across multiple physical data centers and many global Azure regions.

Customer success, no exceptions!

"Coretek was the perfect partner. Because of their breadth of experience within the medical field and knowledge of many Microsoft technologies. They know how to ensure both our infrastructure and IT functions are running at optimal performance so we can deliver innovative treatments and services to our patients. They are our trusted advisors, helping us select services that make us more efficient and that are cost effective for our operations."

—Tim Nemecek, IT Administrator, Genesys Hurley Cancer Institute
