# Proof of Concept

We deliver technology and workflow Proof of Concepts focused on privacy, information governance, legal, and records management within the Microsoft 365 platform.

## Key Use Cases

### PRIVACY

Identify and mitigate organization-wide risks while also meeting employee privacy standards.

### INFORMATION GOVERNANCE

Manage dynamic and complex workflows, policies, and automations within your organization.

### LEGAL

Ensure legally defensible processes are used to manage data, records, and compliance information.

### RECORDS MANAGEMENT

Leverage Microsoft 365's record management features while handling compliance, retention, and disposition obligations.

## Leveraging Microsoft 365

Managing and minimizing risk in your organization starts with understanding risk types found in the modern workplace. While some risks are driven by external factors and outside direct control, many risks are driven by internal events and employee activities. For example, some risks are from illegal, inappropriate, unauthorized, or unethical behavior and actions by employees and managers can be eliminated and avoided in the future.

Most Microsoft 365 deployments focus primarily on business requirements, not the legal risks. However, Lighthouse delivers technology and workflow Proof of Concepts focused on privacy, information governance, legal, and records management within the Microsoft 365 platform.

Take advantage of Microsoft 365 enterprise content and collaboration with the proper configuration, including extending customizations that automatically enforce business rules, policies, and programs.

## Reduce Risk and Deploy With Confidence

Lighthouse helps organizations deploy Microsoft 365 effectively to reduce risk.

- At the end of your Proof of Concept, Lighthouse experts will walk you and your stakeholders through the process we followed and the results that were observed.
- We will recommend ways to implement advanced information governance and compliance in your eDiscovery program. These recommendations are designed to maximize your cost savings and efficiency and give you the information needed to develop your business use cases.
- The result is a detailed understanding of Microsoft 365 features, workflows, and intricacies as it pertains to your eDiscovery program.

## Why Lighthouse?

With deep expertise in legal mitigation and a trusted Microsoft partner, we can help you eliminate worry while taking advantage of technology.

| PROACTIVE STRATEGY | PROVEN EXPERTISE | ELITE PARTNERSHIP |
|---|---|---|
| Our specialized teams keep pulse on changing technology, hyper-focused on both the technical implications and legal, compliance, and regulatory impacts to provide preemptive solutions evolving your organization's information governance, compliance, and eDiscovery programs. | With more than 25 years of information governance, compliance, and eDiscovery experience, we provide comprehensive strategies and best practices to ensure your programs surpass stringent legal and compliance requirements while reducing risk and costs. | Lighthouse is the premier Microsoft partner for information governance, compliance, and eDiscovery. Our deep-seated partnership with Microsoft is built on trust and a more than 20-year collaboration, resulting in exclusive access to product insights and roadmaps. |

For 25 years, Lighthouse has been a leader in innovative software and services to manage the increasingly complex landscape of enterprise data for compliance and legal teams. Whether reacting to incidents like litigation or governmental investigations or designing programs to proactively minimize the potential for future incidents, Lighthouse partners with multinational industry leaders, top global law firms, and the world's leading software providers as a channel partner.
