Simplify the way you manage your contract and acquisition processes with Microsoft Azure and Power Automate

Combine Idea Entity's Cloud Platform expertise to rapidly drive organizational change through adoption and change management services leveraging Microsoft 365 technologies.

Procurement Process Assessment:

We can show you how the organizational process will evolve to create business success in the short term and long-term leveraging Microsoft Azure and Power Automate. How to make workflow management drive real value to your organization with our no-cost assessment. Find out why creating a center for process excellence is essential and how to go about it. Improve your processes across your organization today by maximizing your investment with Microsoft Technologies.

We deliver the following assessment:

1. Assess the current AS-IS state of the contracts, procurement process
2. Bring awareness within the organization – of the current process state, and people
3. Assist in defining the TO-BE state for your business to succeed
4. Develop visual storyboards – to show how our approach can improve process outcomes
5. Roadmap to help with scoping and prioritization of solution execution

WHAT WE OFFER

To streamline processes and operations, business owners must first identify inefficiencies residing within current systems. With our Change Management approach, we uncover and mitigate process inefficiencies, review organization and employee practices, to eventually deliver an automated solution that is practical, usable, and intuitive.

The assessment results in a clear understanding of the current challenges within the Procurement area, help in defining what a successful future TO-BE model can be and as a leave behind, you, the customer will get a copy of visual storyboards that can help with future successful implementation. The assessment is a half-day effort, with questionnaires and whiteboard sessions engaging subject matter experts (SMEs) to understand how the organizational process will evolve to create business success in the short term and long term. The result of the assessment is visual storyboards which will be delivered within 5 days from the end of the assessment. This is a \$3,500.00 assessment value at no cost to you.

Business Benefits

- Built an enterprise-wide Microsoft 365 based system to capture all Service Contracts and reduced must-pay contracts size by 38% in the first year
- Using Microsoft 365, build an integrated, standardized process that gets spending visibility, increased approval efficiencies
- Standardized a manual process into an online Microsoft 365 solution, with increased visibility on Categories, Spend, and Timelines
- A value proposition that includes long-term and short-term goals and an indication of return on investment

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.
