Power BI Quick-Start, 2-Week Implementation Package

Successfully and Rapidly Rollout Power BI, Increase User Adoption, and Maximize the ROI of Your Power BI Subscription

Are you looking to use Power BI, but not sure how to organize, analyze, and turn your raw data into integrated Reports and KPI Dashboards? Do you want to unify and aggregate your data from multiple disparate systems into centralized and integrated data platforms and Power BI Dashboards?

Our 2-Week Power BI Implementation Package helps clients identify the right metrics and KPIs, connect and integrate their systems, and develop integrated Power BI visualizations, reports, and dashboards for their unique business and BI needs.

Why customers use our 2-Week Power BI Implementation Service:

- Rapid and successful deployment of Power BI in 2 weeks
- Systems integration to unify and aggregate your data
- Building the right foundation and technical design as well as best practices for Power BI implementation and rollout
- Admin Training and Knowledge Transfer

Value to Customer

- Rapid Power BI Implementation and Rollout
- Maximized ROI and User Adoption
- The Right Technical Design and Data Architecture

How It's Done

- Define the Right KPIs and BI Requirements
- Design, Implement, and Rollout One Power BI Dashboard in 2 Weeks
- Admin Training and Knowledge Transfer

Results and Deliverables

Design and implementation of one (1) small to mid-size Power BI Dashboard- based on your company's unique BI needs, data structure, and security requirements. This solution will maximize your ROI and adoption and establish the right data and technical design for your BI platform.

> "Optimum's ability to prioritize our project and work with us to meet our ever-evolving needs was exactly what we needed, and we would not have been able to successfully implement without their tremendous support."
