

A photograph of a group of people in a meeting. In the foreground, a man with a beard and a blue shirt is leaning over a table, pointing at a tablet screen. A woman with blonde hair is also leaning over the table, looking at the screen. In the background, two other men are visible, one wearing glasses. The scene is set in a modern office environment with a white table and a blue background.

Accelerate Results with Atmosera Managed Public Azure.

Moving to public cloud can unlock tremendous advantages - from lower operational costs and improved risk management, to accelerated gains in scalability, functionality, and resiliency. With over 20 years of infrastructure deployment and operations experience, Atmosera is a leading provider of business-class cloud enablement and management. Our award-winning Azure services simplify the process of transitioning from an on-premises or hosted environment to the optimal public cloud environment designed to maximize what Azure can deliver for your business.

Added peace of mind

Atmosera's proven Azure management practices ensures visibility, performance, security, and reliability throughout your Azure adoption journey.

Stay operational 24x7x365

We provide around the clock live support with real-time advanced monitoring and remediation workflows to keep Azure performing at its best.

Lower Operational Costs

We help businesses move their applications to Azure, saving on infrastructure, hardware and continuous maintenance costs.

WHY AZURE AND ATMOSERA?

Microsoft Azure is a public cloud with true global reach.

Azure has the most comprehensive set of compliance offerings, covering the highest number of global regions. It also offers the most end-to-end tools for scalability, reliability, and consistency, and offers the greatest degree of integration with on-prem, hybrid solutions of any public cloud platform. Simply put, Microsoft Azure delivers the most complete public cloud ecosystem of solutions.

Businesses leveraging Azure have access to a tremendous number of solutions. From cloud native services, traditional IaaS elements, to a myriad of developer-oriented, application centric, or data focused solutions, Azure delivers functionality to achieve many business goals.

Atmosera is a leading managed Azure services provider

We are a Gold Level, Tier I CSP with COSN and Azure Certified for Hybrid designations. More importantly, we translate our years of Azure experience into your success.

Our Azure architects work alongside your teams to define your business objectives and desired outcomes. We assess, architect, deploy, and manage Azure solutions that keep your business optimized, adaptable, and ready for any challenge; the result of which is peace of mind that we have you covered.

ARCHITECTED ACCURATELY, DEPLOYED FAST, MANAGED RIGHT

- We architect Azure from an application-centric, operations mindset for how it will perform in real life, for flawless implementation to deliver immediate value.
- We provide clear service and design documentation covering IaaS, hybrid, and PaaS deployments for clarity and transparency.
- We guarantee proven management practices that ensure visibility, performance, security, and reliability.

OUR PROMISE TO YOU

We understand the requirements of outsourcing your Managed Azure environment. We understand the mission critical nature of the applications that reside on the Azure environments we manage.

The entire team at Atmosera will provide you with the resources, availability, attitude and aptitude to ensure you and your environment are taken care of, the solutions function as expected, and the reliability of our 24x7x365 management allows you to focus on other strategic areas of your business.

You will find us easy to work with, straightforward in approach, and very much a company that delivers enterprise-grade Azure solutions with a personal touch.
