- > Alithya in the top echelon of Microsoft's Business Applications global network of partners
- > Top Microsoft Partner

As threats become more complex, help secure your users with integrated threat protection, detection, and response across endpoints, email, identities, applications, and data

Microsoft 365 Defender is a unified pre- and post-breach enterprise defense suite that coordinates Detection, Prevention, Investigation, and Response across Endpoints, Identities, Email, and Applications to provide integrated protection against sophisticated attacks.

With the integrated Microsoft 365 Defender solution, security professionals can mitigate the threat signals and determine the full scope and impact of the risk; how it entered the environment, what is affected, and how it is currently impacting the organization. Microsoft 365 Defender takes automatic action to prevent or stop the attack and self-heal affected mailboxes, endpoints, and user identities.

Services included with Microsoft 365 Defender:

- Defender for Endpoint
- Defender for Cloud Apps
- Defender for Identity
- Defender for Office 365

Alithya can assist your organization in deploying the full feature set of Microsoft 365 Defender to get the maximum protection for your organization. Alithya will work with your organization to assess the active environments, provide summary of findings using Microsoft Secure Score and help put in a plan to remediate outstanding threats.

Let Alithya help your organization in choosing the right products to fit your organization's needs. Leveraging the Microsoft Secure Score in our Security Assessment, Alithya can build a customized solution to ensure your organization is protected and your organization's compliance goals are met.

Microsoft Security Assessment

Alithya leverages Microsoft Secure Score to assess your current security posture and identify potential improvements across all your Microsoft 365 workloads with centralized visibility.

Assess your security posture

Together we will assess the state of your security posture across identity, device information, apps, and infrastructure to benchmark your organization's status over time.

Identify areas to improve and create a plan

Evaluate each recommendation using embedded guidance to determine which vectors of attack are a priority and how they can be mitigated. Alithya can assist your team in adding improvement actions to your Posture Improvement Plan.

Drive posture improvements into production

Utilize integrated workflow capabilities to help determine potential user impact and the procedures necessary to implement each recommendation in your environment.

Report improvements to leadership

Employ historical reports to track and maintain progress, identify regressions, and report to leadership teams. Utilizing measurable data, to clearly demonstrate the progress you are making to better secure your environment.

Contact Us

Alithya is a leading strategy and digital technology company with thousands of highly skilled professionals delivering solutions across Canada, the US and Europe.
