Enable a Modern Digital Workspace
by delivering apps and desktops to any device.

Get an easier path to modernising your environment by creating a more mobile and productive workforce through Azure Virtual Desktop (AVD).

ENGAGEMENT ROADMAP

Our Azure team delivers an accelerated deployment that utilises in-house tools and a trusted delivery process that follows Microsoft best practices.

| PHASE 1	PHASE 2	PHASE 3	PHASE 4
Develop requirements to support your applications and users	Present Solution, high level economics including a technical overview and pilot	Deploy and execute the AVD services on a new or pre-owned Azure subscription	Personalize the environment to scale and support your user load

WHY VERACLOUD?

Our engagement consists of a rapid and secure deployment, with advanced schedule and event based autoscaling, image and role-based management, FSLogix profile management together with other AVD and Azure capabilities. Our implementation can be layered on top of existing deployments non-disruptively and with zero vendor lock-in and managed by our 'Veracloud AVD Manager' through an intuitive user interface.

NEXT STEPS

Contact us today to learn more about our offering and take the next steps to launch your virtual apps and desktop environment.
