

Momentum Azure Cost Optimization (MACO)

Momentum's Azure Cost Optimization (MACO) 3-Day Assessment is a data-driven approach to optimize your current Azure deployment for high availability, security, performance, and cost ensuring you're receiving the full value of the cloud.

The MACO Silver package includes our ROI Opportunity Report which serves as the roadmap for implementing without impact and delivering value for your business. Our team of Azure Architects analyze the ROI Opportunity Report to identify the "Quick Wins". Once identified, we prepare clear and detailed instructions while working directly with you through the implementation process.

1
DAY

Discovery

- Planning Meeting
- Data Gathering
- Data Ingestion
- ROI Opportunity Report

2
DAY

Analysis

- Architect Review
- Architect Q&A
- Architect Recommendations
- ROI Recommendations Meeting

3
DAY

Implementation

- Side by Side Implementation
- System monitoring for impacts
- Deliver final documentation

**SUBSEQUENT MONITORING OF COSTS MEASURING ACTUAL
AGAINST EXPECTED RESULTS**
