

Virtual Desktop Infrastructure Services

Powered by Microsoft Azure and Windows Virtual Desktop

Key Benefits :

- Reduced costs with lower CAPEX requirements for end user computing and reduced IT administrative costs
- Simplified deployment and management of user desktops
- Provides end users mobility and flexibility
- Enhanced security and control over corporate data: Azure MFA, screen watermarking etc.
- Fully managed desktop solution including patching and antivirus
- Available across most common platforms: Web, iOS, Android, Windows and Mac

With more being accomplished outside of the workplace than ever before, there is an immediate need to enable secure, remote IT practices that are simple, efficient and can be done from anywhere on any device.

Ultimately, enabling employee productivity in any situation is a top business priority. That's why IT needs virtualised desktop and app solutions that can be deployed quickly, that minimise costs while maintaining security and that require little to no learning curve of users.

NTT brings you end-to-end capabilities with our Windows Virtual Desktop (WVD) Services, from consulting, technical services and end to end manage services.

With defined virtual desktop and modern management use cases, relevant consulting services, and a world-class global cloud infrastructure – Microsoft Azure.

Together, we can help you define and implement your modern virtual desktop environment based on your specific requirement and use cases.

Consulting Services

- Assess your current desktop virtualization environment
- Discover technical and business requirements
- Align pre-requisites
- Review licensing models
- Discuss your hybrid Azure cloud architecture for WVD scenario

Technical Services

- We help you enable quicker, more cost-effective implementation of Windows Virtual Desktop aligned with your business goals and use cases.

Managed Services

- End to end manage services
- Ongoing monitoring of service operations
- Full management support: monitoring, version upgrades, incident management, including vendor support
- Fulfilment of client requests related to desktop infrastructure, AD and File Share and creation and maintenance of golden images
