Smart Search:
Search function that **thinks along** with you

zühlke
empowering ideas

Invoices, delivery notes, construction drawings or process manuals – Smart Search finds what you are looking for. With Zühlke's intelligent solution, your data no longer needs to be tagged and then searched for at length. Thanks to its semantic search function, Smart Search allows you to access the wealth of data in your company quickly and easily, and to bring together different types of data from various sources.

Your intelligent internal search engine

With **Zühlke's Smart Search solution**, you break down the boundaries that arise in common CMS's as a result of the complex and often unreliable attribution of data.

Equipped with a **trained algorithm**, Smart Search lets you carry out **semantic searches of text files** in your **cloud database**. Using learned contextual knowledge, the algorithm performs an **automated evaluation of your data sets** in order to **answer search queries as quickly, relevantly and comprehensively as possible**. If you search for an annual report, for example, Smart Search will also provide you with **related content such as the quarterly report** – in other words, **an intelligent search engine** for your internal data.

Our solution grows along with your requirements

Using our basic solution, you can **start small and lightweight** to quickly **identify the benefits** for your company. Then, as needed for further applications, you can **expand the AI solution** – individually tailored to your internal needs – and **generate new added value** in all sorts of business areas.

Please give us a call! We are looking forward to starting your AI project with you!

How it works

- You set up the Azure Cloud instance
- Zühlke installs the algorithm and integrates it into the cloud
- You upload your local files to the cloud
- Smart Search delivers precise answers to your search queries

Your benefits

- Efficiency boost thanks to intelligent semantic search function
- Quick and easy lift-off – ready to go in one week
- Customised enhancement of the AI solution to suit your needs
- The concentrated competence of partners Zühlke and Microsoft
