Review your existing Azure architecture to improve its efficiency!

ABOUT SOFTJAM S.P.A.:

We are a system integrator whose mission is to lead customers through their digital transformation journey. We help them adopt leading cloud technologies and we create tailor-made solutions that boost their business.

What our customers are saying

“SoftJam gave us a clear recap of our architecture, highlighting aspects and configurations we’re not aware of.”

CIO – Italina energy company

WHAT WE OFFER

We often face less-than-optimal Azure architectures when we initially approach a new customer.

Thanks to our solid knowledge of Microsoft's Cloud Adoption Framework (CAF) and Well-architected Framework (WAF), we can help you identify the weak points of your current design.

Our advisors will review your Azure architecture to define the gaps from the guidelines depicted in the frameworks. During the gap analysis, we'll cover these aspects:

- Reliability;
- Security;
- Performance efficiency;
- Cost optimization;
- Operational excellence.

Once we complete the assessment, we'll define a remediation plan to address the evidence found by the analysis. You can then decide to apply the remediation yourself, or we can support you in this phase through dedicated project activities or our Cloud Operations team.

Why Azure?

Be future-ready

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data-science tools.

Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90% of enterprises globally.

Build on your terms

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a \$1b+ investment in security R&D and 3,500 cyber security experts, security is foundational for Azure.

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.
