

WINDOWS VIRTUAL DESKTOP ACCELERATOR

IN RESPONSE TO THE COVID-19 PANDEMIC, CAMWOOD CAN PROVIDE YOU WITH A HIGHLY RELIABLE WINDOWS VIRTUAL DESKTOP SOLUTION IN UNDER 2 WEEKS.

We will remotely provision and integrate a practical solution which will comply to the most rigorous governance and security standards to get your staff operating quickly and securely from anywhere.

Leveraging Camwood's delivery operations, we will deploy a rapid build process which is remotely executed from our UK based operations team. The engagement will deliver an enterprise-grade Windows Virtual Desktop environment to support your remote working needs, using the following key highlights:

HIGHLY STANDARDISED

We will deliver a highly configurable build to enable a standardised build process and engagement to reduce time to provision.

RAPID BUILD PROCESS

We will use the most advanced remote delivery mechanisms to ensure a quality build, with minimal input from you.

PROVEN ARCHITECTURE

We will utilise a build process that has been provisioned and has proven stability, that will incorporate Microsoft's best practises.

HIGH TOUCH PROJECT MANAGEMENT

You will receive a dedicated project team and short time scales to get the project off the ground quickly and ensure a quality delivery.

APPLICATION INTEGRATION ADVISORY

We will advise on the best integration options available, to ensure a roadmap of application adoption into the Windows Virtual Desktop environment.

Once live, Camwood can provide numerous levels of support to ensure the successful adoption of the service, either short-term or long-term.
