Managed Windows Virtual Desktop | 2-week QuickStart Implementation | \$14,500

Launch your Windows Virtual Desktop environment quickly to support your organization's remote operations for 25+ users

Deliver a true Windows 10 Multi-user or Single user experience available anytime, anywhere and on any device.

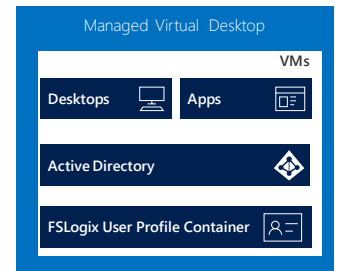

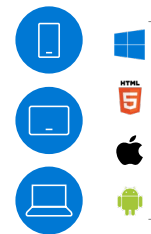

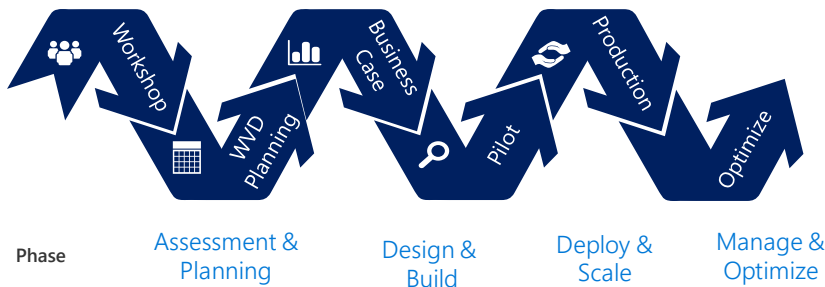

Powered by Windows Virtual Desktop.

Fully managed by Seepath

Ready to use in weeks.

Engagement: Our expert Azure architects and engineering team will help you plan, deploy and operate your remote desktops in the cloud quickly using Microsoft's well-architected framework

Outcome: Production-ready WVD environment deployed for your workforce (25+ users) in weeks that is managed by our Azure Experts

Managed Desktop Benefits:

Fast-Track your WVD deployment. Secure by design

Get up and running with Remote Desktop Environment within weeks using our Azure Expert Services to enable your workforce to work from anywhere on any device.

Predictable Cost

Deliver Remote Desktop experience to your users at a predictable fixed monthly cost per user a month inclusive of infrastructure, M365 license and support cost starting at \$175* per user a month.

Ease of Operations. Unlimited Scale.

Scale easily to meet your current and future user load. Our expert tools and services help you manage and operate your WVD environment with ease, so you spend less time managing the infrastructure and focus more on your business outcomes.
