Why YOU should move to Azure with Velocity Migration Service

REDUCE COSTS

- Avoid end of support costs
- Rationalise and modernise your environment
- ♠ Take advantage of costs saving offers

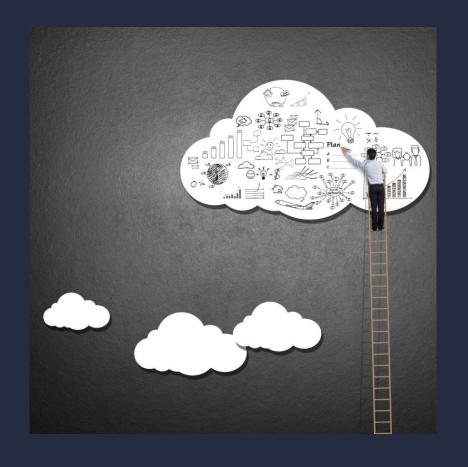

EXTEND LIFECYCLES

- Extend support of your legacy Servers
- Extend the life of your legacy applications

AVERT BUSINESS RISK

- Reduce risk associated with Legacy
 Operating Systems
- Retire Legacy Operating Systems as you move to the Cloud

Velocity Migration

Sol-Tec provides a full range of services designed to help you migrate from your current infrastructure to the Microsoft Azure Platform.

We take a comprehensive approach to migrating your application and datacenter estate.

Our engagement service enables clients to develop a comprehensive strategy for the adoption and exploitation of the full range of Microsoft Cloud technology products.

PLAN & UNDERSTAND

- Assess your current environment
- Understand and define your Business needs

STRATEGY & DESIGN

- Define migration strategy
- Develop delivery roadmap
- Produce Architectural Blueprints

MIGRATE & BUILD

- Migrate services to Azure
- Handover of services

Foundations to Embrace
Future Technologies

"As a public body, it is vital that we demonstrate value for money, which meant we needed greater performance and control at a more reasonable cost. Sol-Tec made this possible. They gave us the autonomy we wanted to administrate and develop our own cloud environment, support to upskill our own workforce...We are already working with Sol-Tec on the next phase of our project to implement PaaS services, such as Azure DevOps, Azure Web Apps and Azure SQL...We know we can depend on Sol-Tec to help us deliver this with success."

Adrian Murphy, Senior Support Analyst, e-LfH

With one million users requiring access to an ever-expanding library of more than 24,000 e-learning sessions, e-LfH required a highly available, scaleable platform to ensure it could meet both its existing and growing demands without issue. There was also a need to rationalise the IT departments at e-LfH and HEE and as part of this process

Sol-Tec's extensive experience and expertise in Azure for public sector organisations, alongside its willingness to give e-LfH autonomy to administrate its cloud environment, is what also set Sol-Tec apart from its competitors in the bid, which included e-LfH's cloud partner at the time.

Less than 3 months from start to finish, Sol-Tec had e-LfH up and running in its new Azure environment and the benefits have been immediately felt.

e-LfH now has a platform that is more than capable of handling millions of training sessions for hundreds of thousands of users, at a fraction of the cost of its previous AWS environment. Benefiting from the Microsoft EA HEE already had in place, it now has access to the latest cloud services and software licenses to keep abreast with the rapidly changing technology landscape, while also benefiting from volume discounts.

The Details

- Simplified, centralised and unified management and deployment experience
- Work with experienced Microsoft Certified Azure Consultants
- So Work with Cloud experienced Programme and Project Delivery experts
- Migrate both Windows and Open Source workloads to Azure
- Migrate from Physical, VMware and Hyper-V to Azure
- Migrate from AWS and other public cloud providers
- Migrate from outsourced data centres or private cloud to Azure
- Agentless options for non-invasive migration to Azure
- Migrate to Azure laaS or PaaS
