

Windows Virtual Desktop is a comprehensive desktop and app virtualization service running in the cloud. It's the only virtual desktop infrastructure (VDI) that delivers simplified management, multi-session Windows 10, optimizations for Office 365 ProPlus, and support for Remote Desktop Services (RDS) environments. Deploy and scale your Windows desktops and apps on Azure in minutes and get built-in security and compliance features

Adfolks is among the WVD Partners of Microsoft to effectively convey PoCs for Windows Virtual Desktop executions. Adfolks' Managed WVD removes the agony of provisioning, application mix, design, and start to finish the board of the total server to screen WVD condition. The managed WVD highlights privileged end client experience, high accessibility, proactive checking, and opportune provisioning of security fixes and refreshes. Decrease expenses and assets related with overseeing on-premises foundation, move to Windows Virtual Desktop today.

Benefits of WVD

- Managed Desktop with far reaching Help Desk and Single point of responsibility for all end-client execution or performance issues.
- End-to-end implementation and integrating with existing applications and peripherals.
- 'Pay as you go' model with NO long-haul responsibility.
- Augmented on adaptable, scaleable and powerful platform on Azure.
- Dynamic increase of workstations.

Day – wise Project Deliverables

Day 1-2:

- Initial kick off meeting and environment assessment
 - Planning Workshop- Business needs
 - Proof of Concept- Data Gathering and Analysis & Findings
- Pre-requisite check and Environment setup

Day 3-5:

- Give Consent to your Azure AD tenant
- Assign the Tenant Creator application roll an Azure AD user
- Create a Windows Virtual Desktop Host Pool for a Full Desktop
- Create a windows Virtual Desktop Host Pool to publish Applications
- Create an Application group and assign applications and users to it
- Setting up Remote Desktop Client app and test the results

Day 6: Testing with Customer Team

Day 7 -11: Extended Support to add more user's and environment setup.
