

Transformation Programme for Cloud

Analysis of current maturity level, a roadmap, and establishment of a Cloud Business Office

The Transformation Programme for Cloud service facilitates evaluation of the client organisation, identifies maturity gaps, and develops a cloud maturity roadmap to prepare people, processes, and technology for holistic cloud transformation.

What is the Transformation Programme for Cloud?

To succeed with cloud transformation you must address not only technology but also people and process.

Our service facilitates evaluation of cloud maturity across your organisation, identifies gaps, and develops a roadmap to prepare for holistic cloud transformation.

We leverage our proven Cloud Maturity Framework to analyse your organisation's maturity across several domains and smoothly transition key governance roles to your team through the establishment of a Cloud Business Office (CBO).

Why customers use the Transformation Programme for Cloud

- Customers have struggled or failed in their cloud journey
- Customers are early in their cloud journey and want to ensure a successful transformation programme
- Customers have a decentralised organisation and want to operate more efficiently or centrally in the cloud

Reduce risk

- Provide governed cloud growth without sprawl
- Establish efficient cloud operations
- Implement a manageable cloud

Reduce IT operating costs

Practical cloud roadmap

Evaluate existing organisational maturity and develop a roadmap inclusive of:

- People
- Process
- Technology

Mature your cloud capabilities

Cloud governance

- Establish enterprise-wide cloud governance
- Increase business agility
- Sustain compliance
- Foster collaboration

Cloud-ready operating model

The Transformation Programme for Cloud provides the people, process and technology roadmap for transitioning your organisation to Microsoft Azure

Maturity Analysis

- Leverages CTP Cloud Maturity Framework
- Analyses client's current state and produces a roadmap for achieving higher levels of cloud maturity
- Establishes a roadmap to increase efficiency, security, and resiliency

Cloud Business Office (CBO)

- Establishes centralised decision-making and communication
- Provides sustained executive and sponsorship alignment
- Ensures strong cloud governance

Transformation Programme for Cloud

Our promise to you

This service addresses people, process, and technology, including day two operations, organisational change, skills, training, and communications across the enterprise.

An offer to get you started

- Analyse current level of maturity across several domains using the Cloud Maturity Framework and develop a roadmap to desired level.
- Define a charter for Cloud Business Office (CBO), its guiding principles and how it is structured - its members, roles, and responsibilities.

Cloud Maturity Framework: Example Domains

Process					Technology			People	
Customer / Service Strategy	Security / Risk / Compliance	Financial / Cost Mgmt.	Vendor / Partner	Service Portfolio & Design	Process / Operation Model	Automation	Run / Operate	Staffing / Talent / Skills	Comm / Culture Change

Why is a CBO important?

The Cloud Business Office (CBO) serves as the central point of decision-making and communication for your cloud programme - both internal and external to your company. It is:

- An industry best practice to ensure the success of your cloud transformation
- A permanent decision-making and governing body
- More than a Centre of Excellence or Programme Management Office

Why Leaven?

Leaven enables New Zealand organisations to accelerate cloud and digital transformation.

We apply proven methodologies to enable your organisation to adopt public cloud services, innovate on the foundation they provide, and optimise and manage your environment, while maintaining governance and compliance requirements.
