Run DAML smart contracts on Microsoft Azure Database

ABOUT DIGITAL ASSET:

Digital Asset helps clients gets distributed applications to market faster via DAML, a smart contract language and developer ecosystem for multiparty workflows. DAML for Azure Database supports DAML apps that run on Microsoft Azure.

See what customers are saying:

"DAML allows the development team to focus on core business logic, as opposed to spending time on infrastructure details."

– Vijay Mayadas, President, Capital Markets, Broadridge Financial Services

WHAT WE OFFER

DAML for Azure Database runs distributed applications that automate interdepartmental workflows and simplify complex business processes on Microsoft Azure Database for PostgreSQL.

DAML for Azure Database provides the integration layer for any business that wants to run a DAML-driven application on Azure. By using this integration layer, businesses are able to prove out future blockchain investment and solve internal workflows.

DAML applications specify who signs, acts, and views various contracts, with fine-grained permissions and authorization clearly defined in the code. DAML ensures that data is visible only to those who have permission to see it. The language and ecosystem also support key enterprise features.

Why Azure?

Be future-ready

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data-science tools.

Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90% of enterprises globally.

Build on your terms

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a $1b+ investment in security R&D and 3,500 cyber security experts, security is foundational for Azure.

Microsoft Azure

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.
