Summary

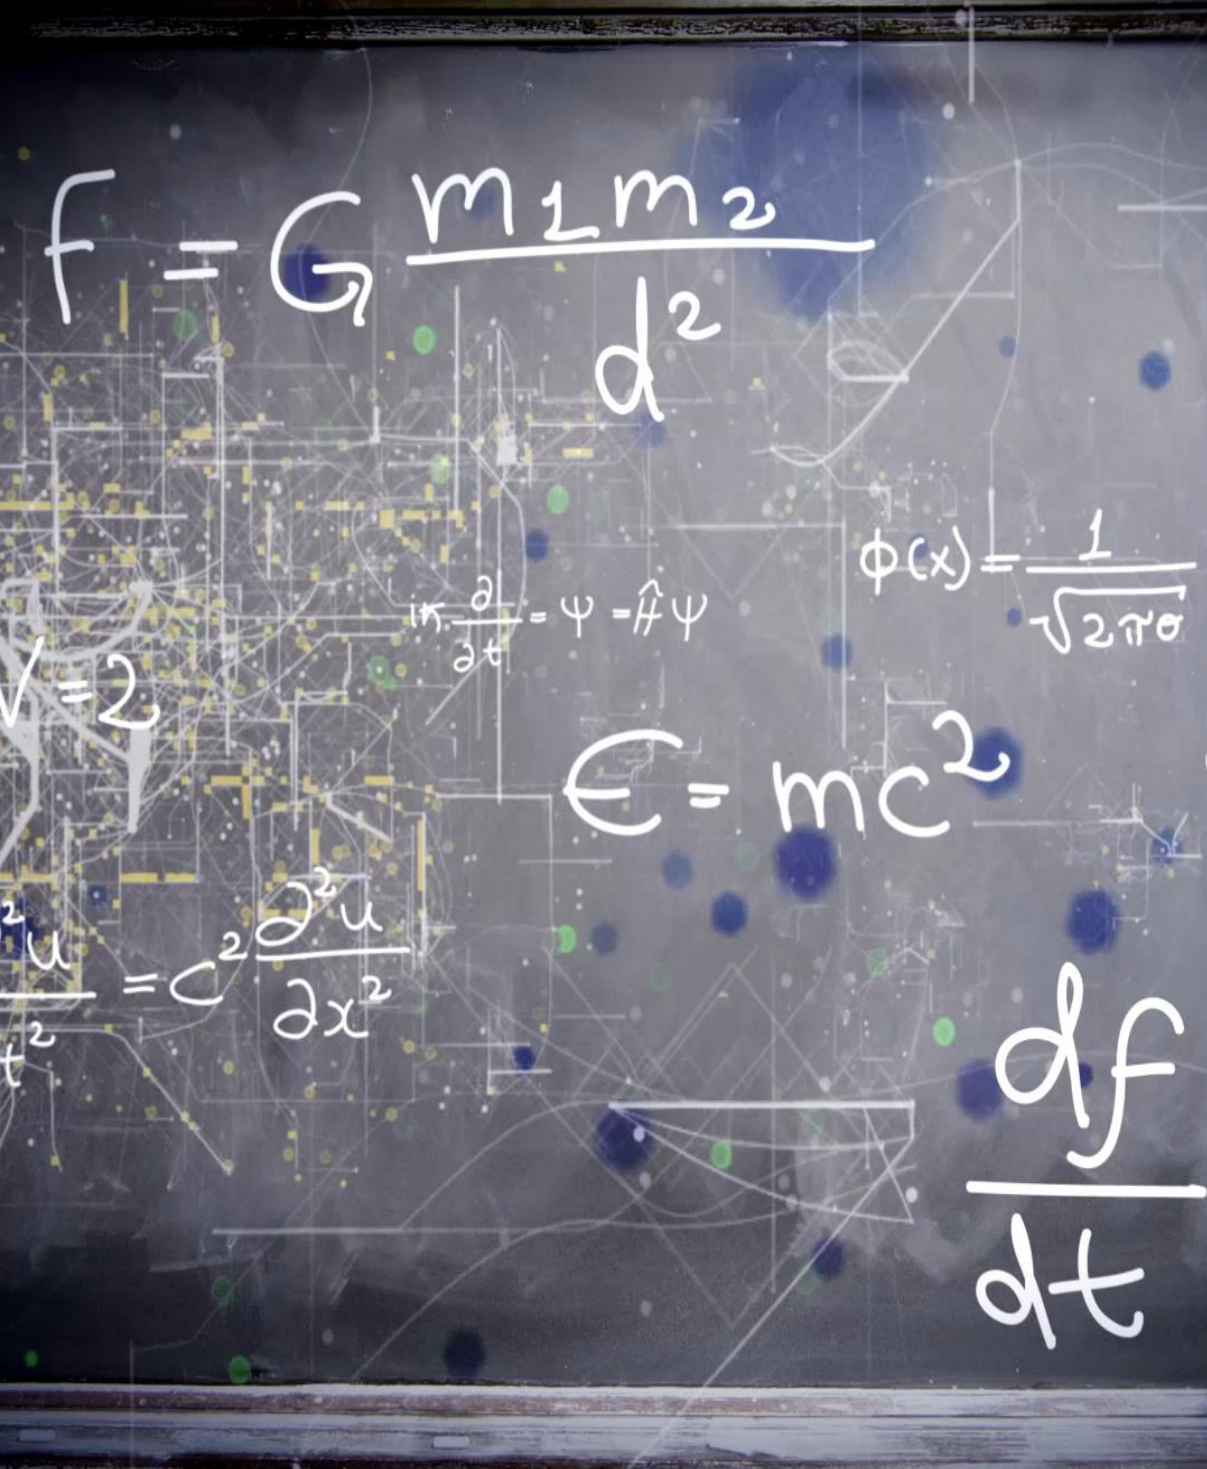

About us

What we do ?

We analyze the needs, implement and train. We provide technical and substantive support. Our goal is to improve companies' business processes in the area of IT systems.

Thanks to **Microsoft 365**, we take the work of companies and local governments to a completely different level of efficiency and security.

We provide a number of trainings as well as technical and substantive support at every stage of using our services.

About service

Microsoft Endpoint in conjunction with Samsung phones. We deliver and configure a ready solution in the field of security and management of Samsung mobile devices.

The Microsoft Endpoint Manager solution helps provide a modern workplace as well as modern data management and security, both in the cloud and in the on-premises environment. Secure all endpoints with device management in Microsoft Intune and Configuration Manager. Endpoint Manager solution meets the needs of the organization during migration to the cloud and manage devices without disrupting existing processes. You can manage encryption, antivirus, firewall, and other security technologies to protect all your work data. Our role is to prepare the organization to effectively use all possible security methods offered by Microsoft Endpoint Manager for Samsung Knox mobile devices.

Choose a flexible path to cloud management

Endpoint Manager meets your organization's needs when migrating to the cloud. Secure, manage and deploy all users, applications, and devices without disrupting existing processes.

Endpoint security supported in the cloud

Help protect your users' devices from threats by choosing Microsoft's Zero Trust technology, which offers unique capabilities.

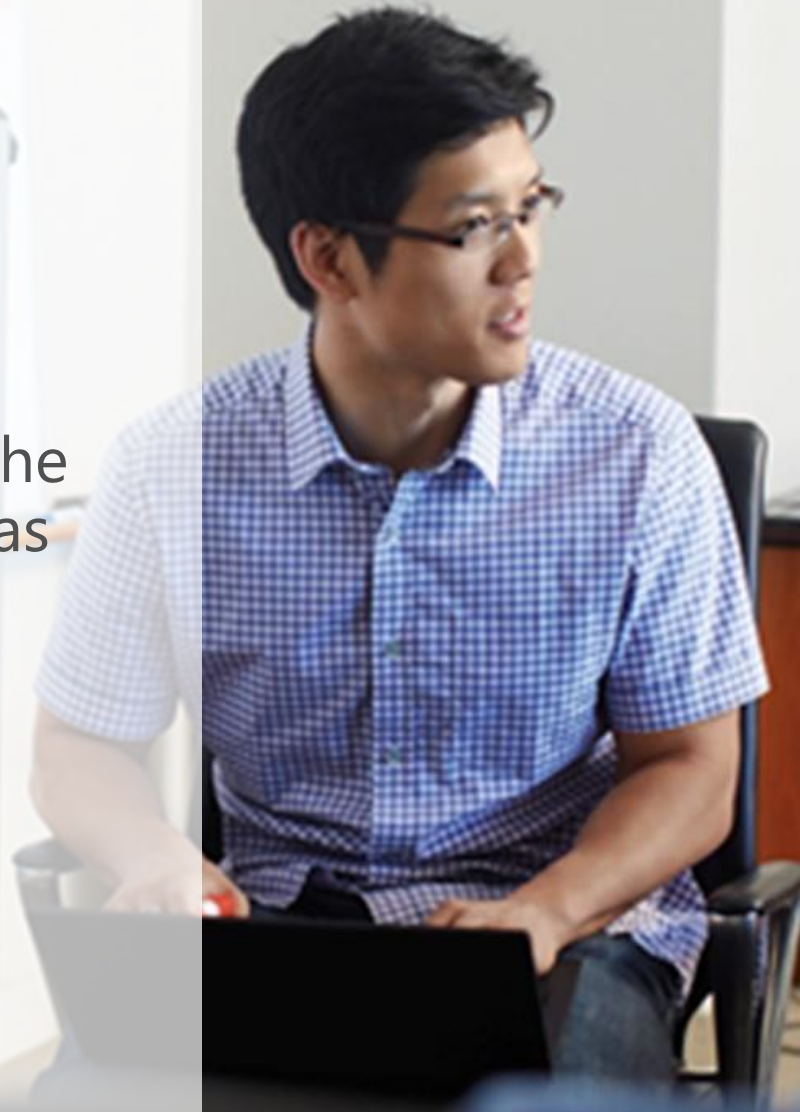

Protect business data with or without device enrollment

Deploy, manage, and report on encryption, antivirus, firewall, and other security technologies to protect business data

Summary

We do more work on phones. The security and confidentiality of data stored on mobile devices requires the implementation of a solution such as Microsoft Endpoint.

Celebrate Success
