

# Business Intelligence With Power BI Fast Start

## Business challenge

Today’s businesses run on intelligence. The ability to discover, share and integrate data intelligence determines which companies thrive — and which will be left behind. However, enabling data intelligence requires a deep understanding of both technical platforms and business enablement, combined with experience creating a thoughtful roadmap to align with repeatable business wins.

## How we help

Insight can help you unlock the value of your data using the robust capabilities of Power BI®. Our award-winning team of designers, engineers, architects and data scientists will help you develop compelling visualizations and intelligence implementations that integrate with your current data estate and demonstrate modern capabilities.

During this Fast Start engagement, we’ll explore:

- Powerful, interactive visualizations
- Role-based access control and segmentation
- Data manipulation and management with dataflows
- Real-time data integration

## Preparing for transformation

To ensure you receive the greatest value from this engagement, you’ll need:

- Business and technical stakeholders hungry to get more value from your data
- Possible scenarios that could benefit from exploration and implementation

### Duration

2–4 weeks

### Benefits

- Identify value cases for your organization.
- Demonstrate rapid prototyping using your data.
- Deploy one or more demos.
- Socialize value in readout sessions.
- Build roadmap of implementation.

## Our approach

Ideation & envisioning	Rapid PoC	Visualization & readout
<p>We'll begin by exploring the power of Power BI® and align its capabilities with your business opportunities. Together, we'll shape one to three cases for Proof of Concept (PoC) implementation.</p>	<p>Next, we'll roll up our sleeves and iteratively deliver on the cases envisioned on the first day of our engagement — and consistently refine our delivery and direction with your business, IT and leadership stakeholders. At the end, you'll receive code and artifacts, as well as one to three demo-ready Power BI solutions deployed.</p>	<p>On the final day, we'll drive executive and technical readouts to facilitate PoC understanding and knowledge transfer covering demos, implementation, value assessments and future opportunities. You'll be equipped to demonstrate value to your business, IT and leadership stakeholders and identify next steps for your Power BI journey.</p>

## About Insight

At Insight, we define, architect, implement and manage Insight Intelligent Technology Solutions™ that help your organization run smarter. We'll work with you to maximize your technology investments, empower your workforce to work smarter, optimize your business and create meaningful experiences.
