

Cloud Transformation Plan

The Cloud Transformation Plan is designed to help initiate a new Cloud Platform and give insight on how to take benefit of cloud native features after the transformation. Cloud Transformation Plan include a series of optional workshops / Assessments and will help customers to take good technical design decisions and best practices to accelerate cloud transformation. Computas will help provide executive oversight and technical advice throughout this phase.

Key Activities can be

Technical Infrastructure Kickoff Workshop

Conduct a one-day workshop to present key decision points on how the platform will be set up for development and production environments.

Technical Operations Kickoff Workshop

Conduct a one-day workshop to share key concepts and best practices for operating a Cloud production service, customized to the customer's application and environment.

Foundational setup

Assist the customer with their foundational setup, such as IAM, platform structure, network structure, based on the information and decisions from the kickoff workshop.

Workload Inventory

Create an inventory of potential workloads target for migration to Cloud. Document key characteristics of these workloads to evaluate in preparation for future deployment.

First Movers Assessment and Migration Planning

Prioritize and select "first mover" applications from the workload inventory. Conduct an assessment and capacity plan for these first mover applications for readiness to move to Cloud. Assist the customer in developing plan for migrating existing or demo application to Cloud, which may result in actual migration of a target application.

Project Planning

Build an initial plan for deployment and migration activities given customer's requirements and timelines.

Deliverables can be

- Technical Design Document
- First Movers Assessment
- Application Migration Plan

Scope and pricing

- Up to 24 FTE days engagement (on-site or off-site at Computas' discretion) within a six-week period
- Pricing will be agreed between customer and Computas depend on the scope of workshop / Assessment
