

ABERSOFT

Windows Virtual Desktop: 1 Day Assessment

**Providing a comprehensive assessment of how your business can
benefit from Windows Virtual Desktop**

Windows Virtual Desktop (WVD) provides a convenient way to virtualize desktops and apps and allow remote desktop access to users, all with a convenient and unified management experience.

Abersoft can provide insight into the best integration of Windows Virtual Machine, tailored to your unique business needs. We prioritize convenience and aim to maximize functionality for your business.

The application and benefits of Windows Virtual Desktop as well as a potential implementation path will be determined by our team through the following process:

1. **Assess:** The Abersoft team will perform a comprehensive review of your current situation and needs as they pertain to the use of Windows Virtual Desktop. We will create a dialogue with your business to get a full view of your needs and goals, and how Windows Virtual Desktop can help your business.

2. **Analyze:** The Abersoft team will delve into the specifications of your use cases, projected workload, and other components that are necessary to determine deployment scaling and implementation requirements for Windows Virtual Desktop.

3. **Improve:** The Abersoft team will provide insight into the benefits that Windows Virtual Machine could have on your business, and discuss potential next steps involving the use of Windows Virtual Machine.

Prices and timelines may vary depending on the size and scope of the project.
