

Content Security & Data Loss Prevention Workshop

Microsoft Purview allows FSi Strategies to assess their current compliance posture and monitor sensitive information. During this three-day Content Security & Data Loss Prevention workshop FSi Strategies will demonstrate how an organization can protect its most important asset, at the source. Ensuring that documents are protected no matter where they live. During the working sessions the following will be covered and demonstrated based on organization need. At the end of this engagement FSi strategies will have delivered the three day workshop to the client and deliver a scope of work document to review implementation options.

Day 1 - Overview

- What is Microsoft Purview
 - What is a data map
