

Lumen Cloud Connect Professional Services

Accelerating the activation of Cloud Connect Solutions

Lumen Cloud Connect Professional Services provide clients with secure, high performance, resilient, highly available hyperscale landing zones integrated with Lumen Cloud Connect Services for Microsoft Azure ExpressRoute. We collaborate with clients to design solutions based on proven best practices learned from multiple customer engagements. Clients gain access to the right cloud architecture based on industry best practise, delivered by an experienced partner.

Lumen Cloud Connect Professional Service engagements are designed to reduce both client workload and the time to deliver a usable end-to-end solution. The Cloud Connect ProServe engagements consist of:

- A Connectivity Build Out Package
- Landing Zones for Cloud Connect

Our approach

Where the Landing Zone already exists, clients can use the **Connectivity Build Out Package** to extend the Cloud Connect service into the appropriate hyperscale account / subscription.

For new environments, Lumen **Landing Zones for Cloud Connect** engagement commences with a one-day workshop to gather data relating to the application that is being migrated. Collaborating with Technical Architects and Network Engineers to understand application workflow and related interdependencies, the Lumen Design Architect will produce a low-level design and target state architecture for review by the client. Once finalised, Lumen will create the landing zone in the client's chosen hyperscale cloud account, deliver connectivity to the Cloud Connect circuit, and handover the environment to the client.

Why Lumen?

Combining cloud, network and technical expertise, Lumen partners with clients to build, run and optimise applications. No matter where you are in your transformation journey, we can help you accelerate your cloud adoption with unbiased expertise across leading technologies.

Multi-cloud expertise

100k virtual machines managed globally

>1000 applications migrated

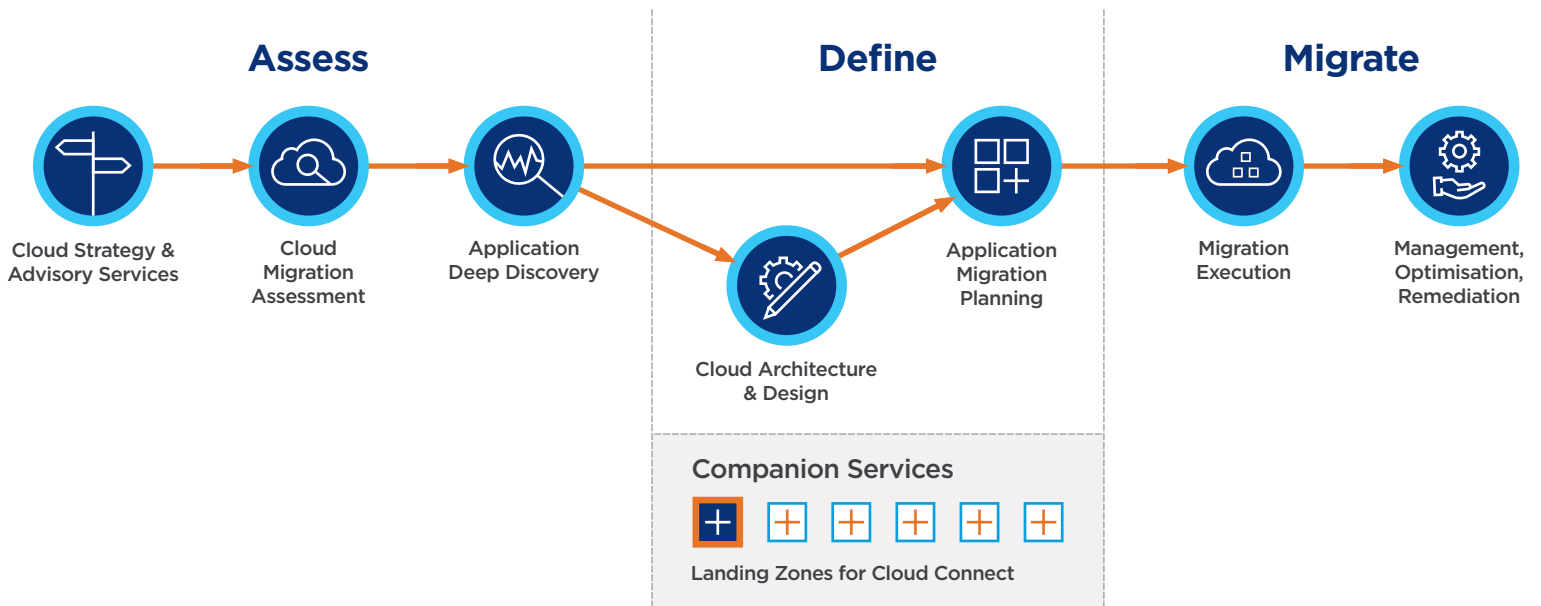

15 years of application transformation, migration and management.

Technology agnostic

Choose the right platform to support your business needs

Lumen cloud adoption journey

Key client benefits

- Solution based on proven best practises, learnt from multiple client engagements
- Access to subject matter experts covering cloud connectivity and landing zone design and build
- Enables faster time to value for Cloud Connect solutions
- Improved control over end-to-end performance of cloud-based applications
- Simplified security, as applications in the cloud remain within your trusted perimeter
- Extensive Wavelength, Ethernet Services and IP VPN connectivity options

Partner accreditations with industry leading providers
