AZURE LANDING ZONE

“Journey to the Cloud” with LINKBYNET

Four pillars to delivering a complete portfolio of Cloud offerings, from defining your Cloud strategy to optimizing your services.

Landing Zone

What is a Landing Zone?

A Landing Zone is part of an Azure environment that has been pre-provisioned with a set of foundational services and best practices to support your workloads.

“ A fully functioning landing zone is the final deliverable of any iteration of the [Cloud Adoption Framework's Ready methodology](#). Azure landing zones enable application migration, modernization, and innovation at enterprise-scale in Azure. ”

<https://aka.ms/landingzone>

5 key principles

These 5 key principles help create a robust scalable landing zone.

Networking

Use networking services to keep your app connected and add workloads without disruption.

Identity Management

Set identity management rules so only trusted users can access your data.

Environment Governance

Govern your environment with integrated compliance policies to ensure your workloads meet industry regulations.

Security Controls

Use security controls to create a safe place for your data.

Environment Management

Manage your environment by monitoring performance and creating a resilient base for your workloads.

Opting for a Landing Zone

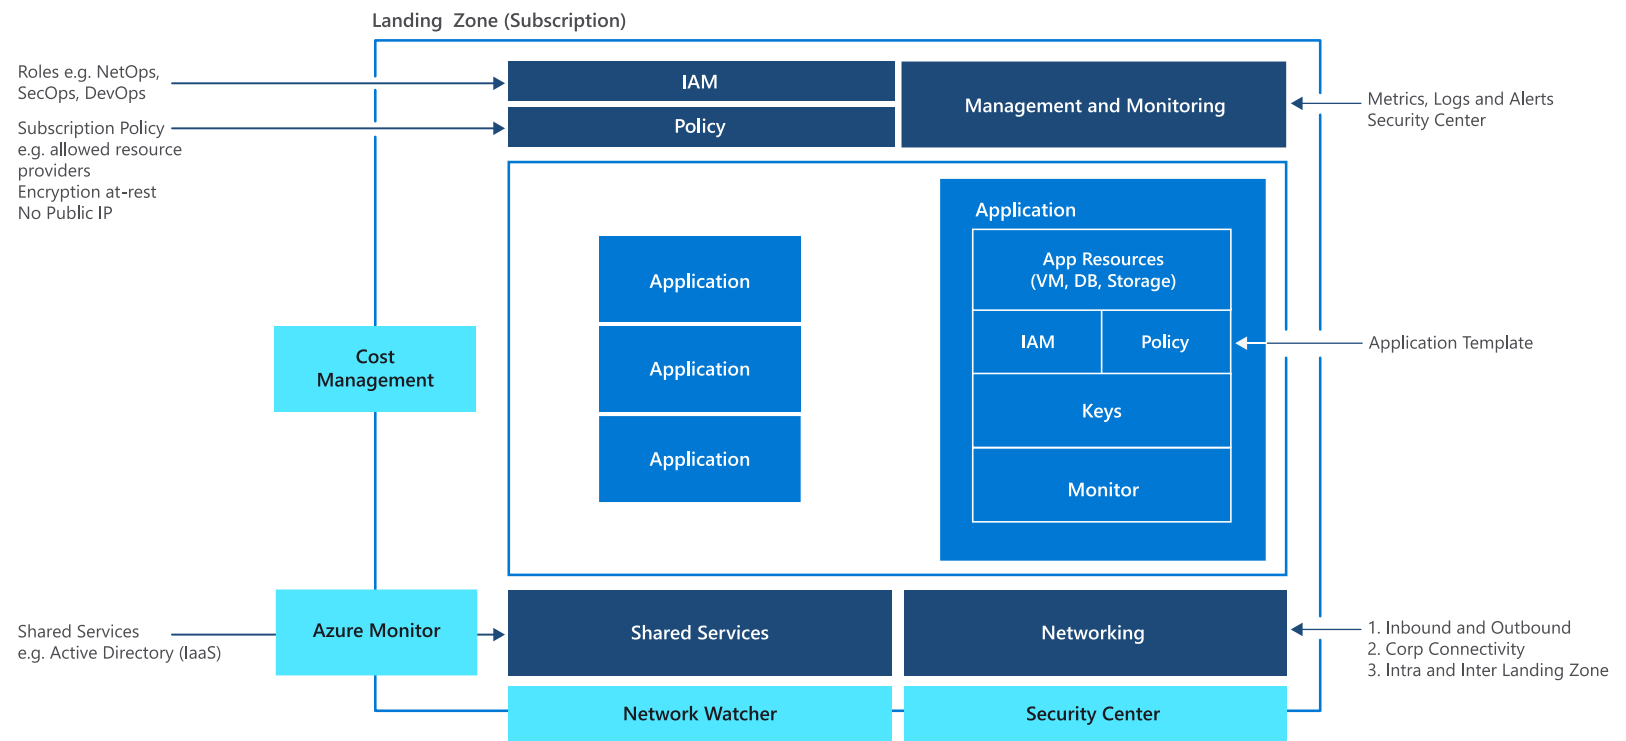

Reasons for setting up a landing zone

By building Azure landing zones, you're creating your cloud environment to align with best practices and establish guardrails.

- Cloud architecture in line with your policy
- Short time-to-market (Speed and scalability)
- Security and compliance
- Flexibility
- A more controlled cost structure

Build your cloud environment with Azure landing zones

Scalable, modular implementation options to build out your cloud environment.

Our Approach

Design and Implement your Landing Zone

Initial configuration for:

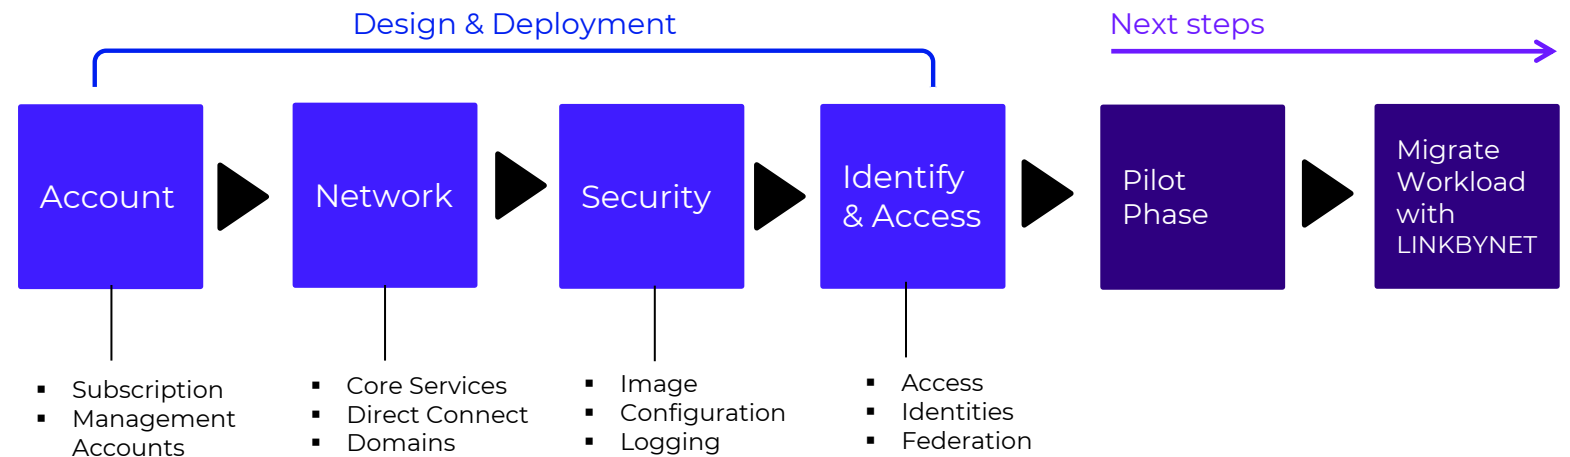

- Account Structure
- Network Structure
- Pre-defined Identity and Billing Frameworks
- Pre-defined User Selectable Packages

Customer benefits

- Ready for initial migration (scope is defined and secured)
- Ready for migration and further customization

Linkbynet proven methodology

Over the years and the thousands of workloads we have migrated to the Cloud, we have developed a robust and proven methodology.
