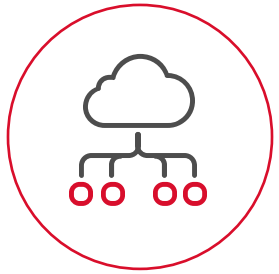
Azure Cloud Solutions – Areas



Cloud Enablement

Enabling our clients the journey to the cloud.

- Security & Governance
- Strategy & Cloud Migration
- Cloud Management

Enterprise Integration

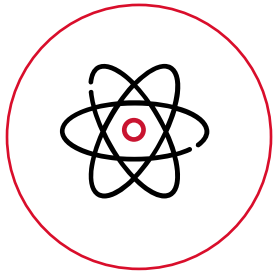
Integration built on a modern cloud native architecture.

- Service Bus / Micro-services Architecture
- Hitachi Integration Framework / Accelerator
- The *new* BizTalk

Cloud Native Apps

Modern applications build for the cloud.

- Custom apps
- Rich UI
- Custom Dev / Web Dev
- Serverless / containers



Development & Operations

Embracing the DevOps culture, driving developer velocity and automation.

- Improve development speed
- Reduce Technical Debt

Cloud Solution Propositions

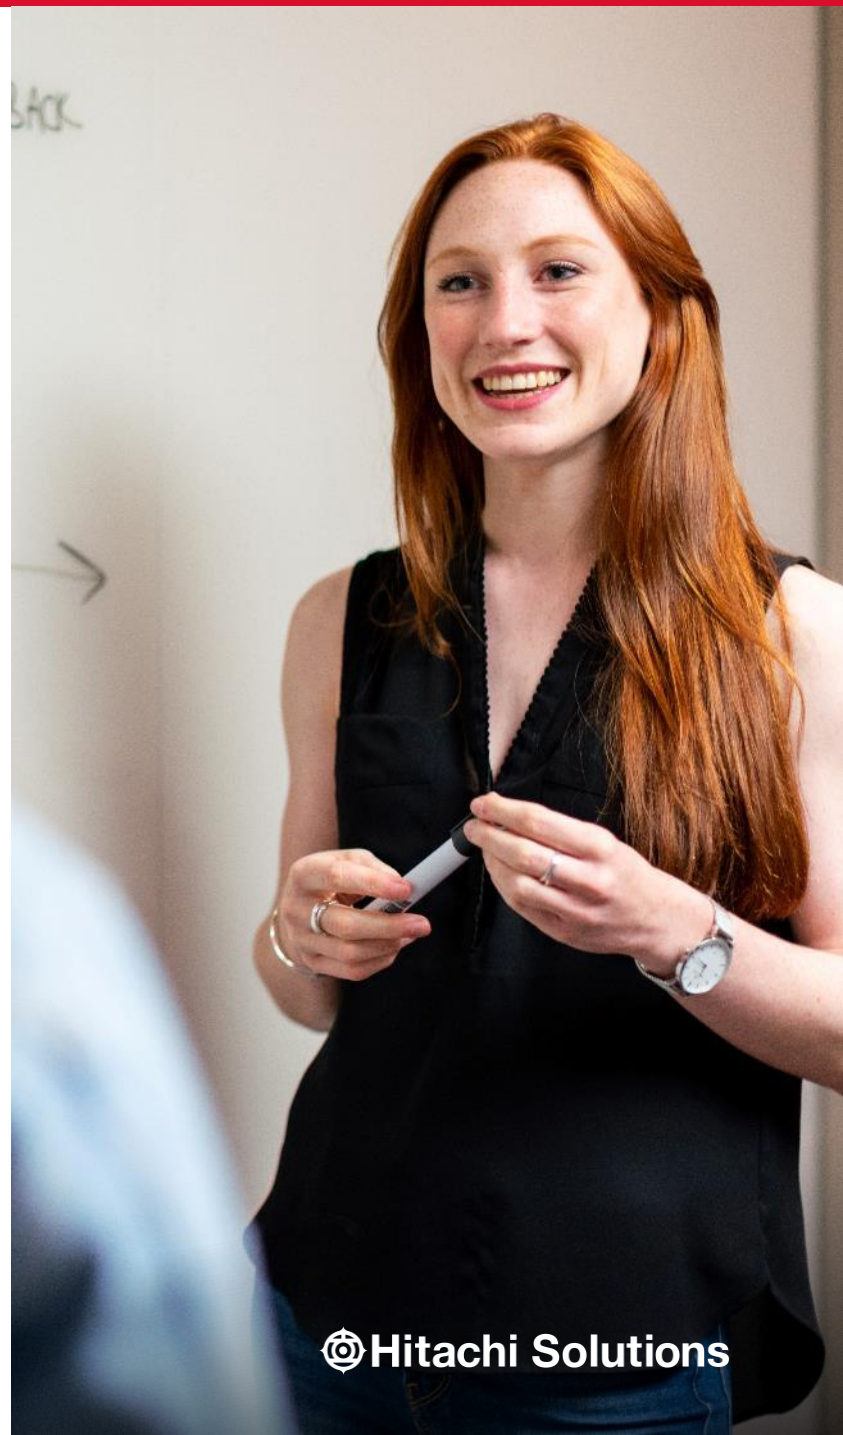
PROPOSITIONS

Azure Agile: Governance Assessment

A proper cloud adoption is a journey and not a destination, it is a continuous process formalised on specific **methodologies and best practices**.

The goal of our cloud assessment is to assess these methodologies and best practices and to provide a **clear path to consolidate the cloud governance and security**.

With our assessment your teams will be enabled to naturally **integrate policies and disciplines** without any disruption throughout the journey. Our goal is to **integrate the five disciplines in your methodologies**, avoiding any major change in your processes.



* Power BI is a leader in the 2020 Gartner Magic Quadrant for Analytics and Business Intelligence Platforms report - see https://info.microsoft.com/ww-landing-2020-gartner-magic-quadrant-for-analytics-and-business-intelligence.html?LCID=EN-US

PROPOSITIONS

Azure Agile: Cybersecurity Assessment

Our Cybersecurity assessment provides the **360 degree view** and **analysis of the security level of the entire company Cloud** in respect of the methodologies, practices and IT systems by verifying and evaluating the processes and technologies in use.

The objective of our cybersecurity assessment is strategic, is establishing how much the company is exposed to possible security events to **outline the path to enhance the security posture**.

At the end of the verification, our security experts will be able to propose an **action plan to improve the level of security**, aligning the **cybersecurity strategy with the business objectives**.

PROPOSITIONS

Azure Agile: Integration Assessment

Companies use an infinite number of different applications, distributed between **on-premise and cloud environments, private and public.**

Application integration is central to business agility as it facilitates collaboration with third parties, partners, customers and suppliers, and simplifies the replacement of existing software with more recent and advanced versions.

During our **Integration assessment** we will uncover your true business goals, understand your processes, and conduct a thorough application review. We can provide an assessment for any type of scenario, whether it is existing solution, an ongoing project or a pre-project evaluation. At the end we will provide you with a **Cloud Integration Assessment Report** containing a full set of detailed and actionable recommendations.
