## **Proposal For: Front Row Pilot**

**Presented By:**

 RED THREAD

## AUDIOVISUAL SYSTEM EXECUTIVE SUMMARY

### FRONT ROW ROOM PILOT

#### OVERVIEW:

Red Thread will provide and install a Microsoft Teams Front Row room system using a new 105-inch Diagonal, 21:9 display measuring 8' wide x 3.4" high designed for the new Microsoft Teams Room Front Row layout. Local presentation and content sharing will be via wirelessly sharing on a Teams meeting or via a wired HDMI connection at the table. The Custom table manufactured by Create by Red Thread will provide optimal viewing angles for camera pickup to provide the smart gallery of the Microsoft Front Row layout. The table will also have Qty 3 table boxes with AC, USB and USB C power modules. A tabletop Logitech Tap touch screen will provide a native Microsoft Teams experience and connect to the system at the table box. Audio pickup will be via a ceiling microphone array and audio playback will be via four (4), ceiling-recessed speakers. Installation is quoted during regular business hours and performed by Union workforces. The client is responsible for ensuring a clear path to bring the display into the room, for bracing the wall for the display, for ensuring clear cable paths, for providing network feeds and electrical outlets at the wall box and ceiling enclosure, for providing electrical outlets beneath the table, for providing the Microsoft Teams license, and for providing IT support to bring the system on-line.

\*\* Please note labor cost is based on **weekday** non-union installation. Weekend and/or union installation prices differ.

#### WARRANTY AND SERVICE DETAILS:

No other warranties, either express or implied, are extended by Seller except as shall be shown in writing and signed by a duly authorized representative of Seller. To the maximum extent permitted by applicable law, seller further disclaims all other warranties either expresses or implied, including, without limitation, any implied warranties of merchantability of fitness for a particular purpose.

#### SCOPE OF WORK

##### SCOPE OF WORK TO BE PERFORMED BY RED THREAD:

The above outlined audio visual functionality scope and system description will be executed by Red Thread upon acceptance by the customer. Scope of work to be performed by Red Thread includes:

- System Design and Engineering
- Project Management and Coordination
- Product Staging and Testing
- On-site Product Installation, Low Voltage cabling as it relates to the Audio Visual system Testing and Commissioning by a field engineer
- Closeout documentation (if applicable): As-built drawings, DSP/Programing files and Network Device Spreadsheet

##### SCOPE OF WORK TO BE PERFORMED BY CLIENT:

The Scope of Work document detailing all work to be performed by the client and/or other trades will be provided after the formal award of project has been received by Red Thread. Scope of work to be performed by the client and/or other trades, includes but not limited to the following:

- Electrical
- Network/data
- Phone service
- Blocking infrastructure
- Conduits
- Floor cores

# Proposal

- Furniture fabrication
- Patching and Painting

Red Thread has the ability to provide many of the above listed items currently under the client's scope of work. If you would like Red Thread to provide a proposal to provide any of the infrastructure items please contact your account representative.
