Kanda is a premier software development and quality assurance partner delivering complex world-class software solutions to clients ranging from Fortune 500 companies to dynamic startups. Our track record includes successful completion of over a thousand analytics, integration, search, BI and knowledge management, publishing and educational, healthcare, multimedia, mobile, and other technology solutions to software vendors, services companies, healthcare providers, financial institutions, publishers, universities and libraries.

Combining an in-depth understanding of clients' needs and business drivers, commitment to service value and excellence with a fast and efficient approach to entering and exiting development and quality assurance processes.

Over 50% of offshore initiatives fail.
100% of Kanda projects GET DONE.

What Makes Us Unique

- Unlike many outsourced, offshore software developers, we work end-to-end with our clients as partners, understanding their vision, collaborating closely to define product specifications, and standing up the right teams to reduce time to market.
- Kanda is notorious for the unprecedented breadth of technical expertise among mid-sized software outsourcing providers
- Exceptional engineering talent and rigorous process with quality assurance baked throughout
- Commitment to client satisfaction paired with the ability to rapidly scale up or down the development team depending on the project requirements
- Excellent 20-year long US practice combined with offshore resource allocation delivers accountability at reasonable prices
