

Intelligent Lighting Solution

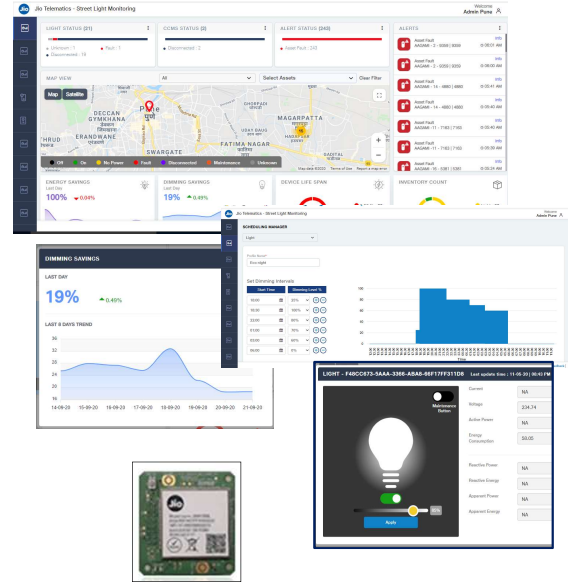

Unified End-to-End platform for all lighting needs

Remote Monitoring | Asset Management | Light Management | Energy Saving

Key Features

- ✓ LED driver integrated connectivity module
- ✓ Plug-n-play solution for connecting lights to the cloud without any onsite commissioning or provisioning efforts
- ✓ Supports – On / off, dimming, energy metering and fault detection features
- ✓ Single dashboard to view millions of Lights under different projects
- ✓ Schedule Manager for better energy saving
- ✓ Unified portal and API integration support for 3rd party apps like – Smart City App

3GPP Compliance NB-IoT NIC Card

Network Interface Communication (NIC)

Agile Communication Hardware

Interface with any type of LED light driver irrespective of wattage and get required Light data on a single platform within few seconds!

Multi Sensor Integration Support

View data from driver as well as from third party sensors like motion sensor, lux sensor etc.

A Comprehensive Solution – Ready for Smart City

Communication hardware (3GPP Compliant)

Offering

- NB-IoT NIC card or module as per business need
- FOTA Support
- Integrate with any type of LED driver
- Industrial grade embedded SIM support

NB-IoT Connectivity

Offering

- Pan India NB-IoT network service
- Bundled connectivity
- Connectivity Management Portal (CMP)
- Bundled Platform Services
- Bundled APIs

Platform Services (Cloud)

Offering

- Secure Data Ingestion
- Data Processing
- Data Management
- Data Storage
- Reports
- Dashboards

User Interface & APIs (Portal Services)

Offering

- Intuitive User interfaces / Portal
- B2B APIs for Smart City or 3rd party Apps
- Integration support

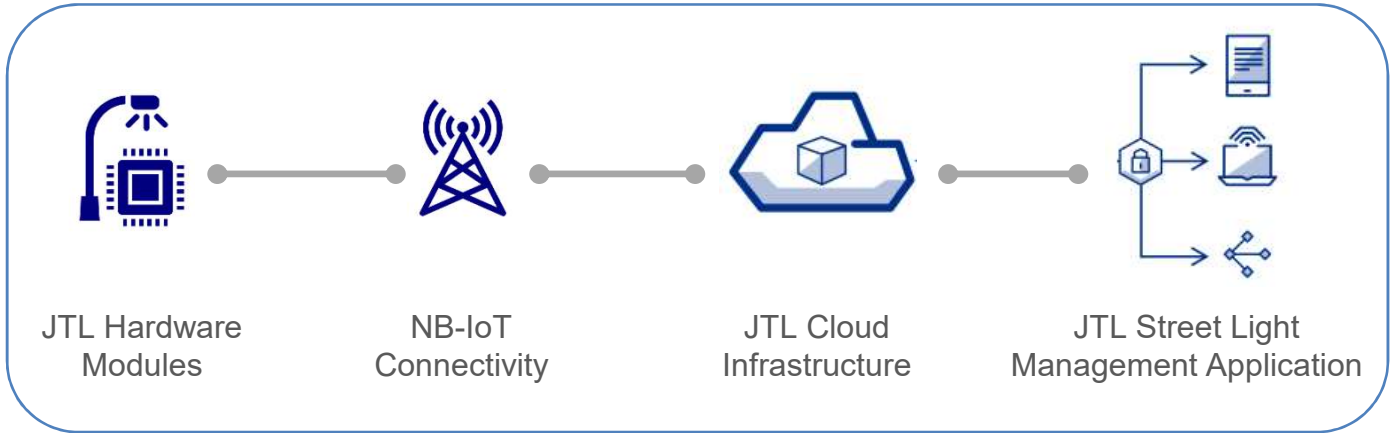

Business Support (Integration & Service)

Offering

- Integration engineering support
- L1, L2 & L3 Support
- 1000+ Pan India Jio Center for service
- Device warranty as per business model

One-stop-shop Solution

Business Benefits

- ✓ **Up to 25% of energy savings** using highly optimized scheduling algorithms
- ✓ **Reduced TCO** - One-stop-shop reduces multi-vendor payouts, simplifies management of IoT solution and thus reduces total cost of ownership
- ✓ **Scale to millions of lights using** Pan-India NB-IoT network and get rid of infrastructure hassles
- ✓ **Zero** network setup and network management manpower cost
- ✓ **Plug & Play device integration** removing installation hassles
- ✓ **Increased safety of people** by identifying faulty lights
- ✓ **Future proof and secure** fully encrypted data flows, the system meets the highest standards for security

Jio Advantage

End to End Capability

Massive IoT Portfolio

Integration & Engineering Support

Network Assurance

Proactive Service
